† During the course of the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry. Many people who consider themselves Hispanic or Latinx, which is an ethnicity, will use one of these or an equivalent term to describe their race, which then gets categorized as "Other" race. Currently, 90.4% of case-patients shown as "Other" race above reported that they are Hispanic or Latinx.
