Oregon's Vaccination Trend: Doses Administered by Day

People Vaccinated by Demographic Group

These tables show the number of people who have received COVID-19 vaccine as reported in Oregon's ALERT IIS by race, ethnicity, sex and age group. People are grouped by rarest racial and ethnic identity of racial and ethnic groups from rarest to most common for the vaccination data is: Native Hawaiian and Pacific Islander, Black or African American, American Indian and Alaska Native, Hispanic or Latino/a/x, Asian, White, then Other Race. Rarest race methodology does not have a multiracial group.

RACE/ETHNICITY₁₁

Individuals contribute to the counts of only one racial/ethnic group.

AGE	GRO	UPS

	People Count	% of Total Persons Vaccinat
American Indian / Alaska Native	35,095	1.8%
Asian	99 <i>,</i> 936	5.1%
Black	33,780	1.7%
Hispanic	138,234	7.1%
Native Hawaiian / Pacific Islander	19,669	1.0%
White	1,355,194	69.4%
Other Race	96,670	4.9%
Unknown	174,643	8.9%
SEX		
	People Count	% of Total Persons Vaccinated
Female	1,059,426	54.2%
Male	884,941	45.3%
Unknown	8,854	0.5%

	People Count	% of Total Persons Vaccinated
16 to 19	67,404	3.5%
20 to 29	230,136	11.8%
30 to 39	296,261	15.2%
40 to 49	293,533	15.0%
50 to 59	298,578	15.3%
60 to 64	170,571	8.7%
65 to 69	190,031	9.7%
70 to 74	166,675	8.5%
75 to 79	109,025	5.6%
80+	131,007	6.7%

Data Source: Oregon ALERT Immunization Information System (IIS) is a statewide, lifespan immunization registry.

COVID-19 vaccination data are provisional and subject to change. Note on 4/9/2021, the data contained in this data visualization were refreshed with a new extract out of ALERT IIS, meaning the data is more accurate and representative of what is contained in the live system.

*COVID-19 vaccination providers must document vaccine administration in their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as practicable and no later than 72 hours after administration.

ese administered counts the number of vaccines administered; people vaccinated counts the number of unique individuals who received vaccine with valid dose numbers; doses with an invalid dose number, for ple due to unresolved duplicate vaccination reports, data entry errors, dose spacing errors, or mixed manufacturers for first and second dose, will not show up in the count for persons vaccinated. It is anticipated c1% of doses will have an invalid dose number.

†Series complete differs from fully vaccinated. Series complete refers to an individual that has received 2 doses of a 2-dose series (Moderna or Pfizer) or 1 dose of a 1-dose series (Johnson & Johnson); people are considered fully vaccinated 2 weeks after receiving their second dose of a 2-dose vacine. Per CDC's recommendation, Individuals who have not passed the two week window after completing their series are NOT fully vaccinated and should continue taking all precautions until they are fully vaccinated.

th Individuals contribute to only one race/ethnicity category. American Indian/Alaska Native may include data reported from the federally recognized Tribes of Oregon. Race and ethnicity is determined by rarest race methodology described in the REAL-D implementation guide from the Office of Equity and Inclusion at the Oregon Health Authority (https://www.oregon.gov/oha/OEI/Pages/REALD.asp. pg 10,94).
