

People Vaccinated by Demographic Group

These tables show the number of people who have received COVID-19 vaccine as reported in Oregon's ALERT IIS by race, ethnicity, sex and age group. People are grouped by rarest racial and ethnic identity of racial and ethnic groups from rarest to most common for the vaccination data is: Native Hawaiian and Pacific Islander, Black or African American, American Indian and Alaska Native, Hispanic or Latino/a/x, Asian, White, then Other Race. Rarest race methodology does not have a multiracial group.

Date Dose Administered

RACE/ETHNICITY₁₁

Individuals contribute to the counts of only one racial/ethnic group.

AGE GROUPS

	People Count	% of Total Persons Vaccinated
American Indian / Alaska Native	42,711	1.9%
Asian	117,687	5.4%
Black	41,414	1.9%
Hispanic	165,810	7.6%
Native Hawaiian / Pacific Islander	23,592	1.1%
White	1,511,525	68.9%
Other Race	103,736	4.7%
Unknown	187,876	8.6%
SEX		
	People Count % of	Total Persons Vaccinated
Female	1,172,836	53.4%
Male	1,011,868	46.1%
Unknown	9,647	0.4%

	People Count	% of Total Persons Vaccinated
12 to 15	49,055	2.2%
16 to 19	87,380	4.0%
20 to 29	269,177	12.3%
30 to 39	333,773	15.2%
40 to 49	326,403	14.9%
50 to 59	329,081	15.0%
60 to 64	184,061	8.4%
65 to 69	197,467	9.0%
70 to 74	171,764	7.8%
75 to 79	112,072	5.1%
80+	134,117	6.1%

Data Source: Oregon ALERT Immunization Information System (IIS) is a statewide, lifespan immunization registry.

COVID-19 vaccination data are provisional and subject to change. -On 4/9/2021, the data contained in this data visualization were refreshed with a new extract out of ALERT IIS, meaning the data is more accurate and representative of what is contained in the live system -On 5/10/2021 explaintion estimates were updated from 2015 to 2020 data from Portland State University.

COVID-19 vaccination providers must document vaccine administration in their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration administration data to ALERT IIS as soon as a constrained administration of their medical record systems within 24 hours of administration administration data to ALERT IIS as soon as a constrained administration administr

Notes: **Doses administered counts the number of vaccines administered; people vaccinated counts the number of unique individuals who received vaccine with valid dose numbers; doses with an invalid dose number, for example due to unresolved duplicate vaccination reports, data entry errors, dose spacing errors, or mixed manufacturers for first and second dose, will not show up in the count for persons vaccinated. It is anticipated that <1% of doses will have an invalid dose number.

es complete differs from fully vaccinated. Series complete refers to an individual that has received 2 doses of a 2-dose series (Moderna or Pfizer) or 1 dose of a 1-dose series (Johnson & Johnson); people are Iered fully vaccinated 2 weeks after receiving their second dose of a 2-dose vaccine or 2 weeks after a single-dose vaccine. Per CDC's recommendation, Individuals who have not passed the two week window after eting their series are NOT fully vaccinated and should continue taking <u>all precautions</u> until they are fully vaccinated.

th Individuals contribute to only one race/ethnicity category. American Indian/Alaska Native may include data reported from the federally recognized Tribes of Oregon. Race and ethnicity is determined by rarest race methodology described in the REAL-D implementation guide from the Office of Equity and Inclusion at the Oregon Health Authority (https://www.oregon.gov/oha/OEIPages/REALD.asp pg 10,94).
