<u>Data Source:</u> Oregon ALERT Immunization Information System (IIS) is a statewide, lifespan immunization registry.

On 4/9/2021, the data contained in this data visualization were refreshed with a new extract out of ALERT IIS, meaning the data is more accurate and representative of what is contained in the live system. On 5/10/2021 population estimates were updated from 2019 to 2020 data from Portland State University.

Notes:

**Doses administered counts the number of vaccines administered; people vaccinated counts the number of unique individuals who received vaccine with valid dose number; doses with an invalid dose number, for example due to unresolved duplicate vaccination reports, data entry errors, dose spacing errors, or mixed manufacturers for first and second dose, will not show up in the count for persons vaccinated it is anticipated that <1% of doses will have an invalid dose number.

eries complete differs from fully vaccinated. Series complete refers to an individual that has received 2 doses of a 2-dose series (Moderna or Pfizer) or 1 dose of a 1-dose series (Johnson 8 Johnson); people are isidered fully vaccinated 2 weeks after receiving their second dose of a 2-dose vaccine or 2 weeks after a single-dose vaccine. Per CDC's recommendation, individuals who have not passed the two week window appleting their series are NOT fully vaccinated and should continue taking all precautions until they are fully vaccinated.
