## **About Our Data**

The administration's decisions surrounding the managing of the COVID-19 pandemic are data-driven, literature-based and follow established public health practices. The department uses statewide and national data as well as peer-reviewed literature, and guidance from the CDC and White House when making public health decisions. Decisions are based on science and facts.

## **COVID-19 Dashboard**

The COVID-19 Dashboard, which is updated each day at noon, discloses the number of confirmed and probable cases, negative test results, deaths, ZIP-code level data, hospital preparedness, and case and death demographics. This information is also available for download.

Note: The COVID-19 Data Dashboard does not load properly in Internet Explorer. It is recommended to use Chrome, Edge or Firefox to view the dashboard.

<sup>\*</sup> Total case counts include confirmed and probable cases.

<sup>\*\*</sup> Negative case data only includes negative PCR tests. Negative case data does not include negative antibody tests.

<sup>\*\*\*</sup> Individuals who have recovered is determined using a calculation, similar to what is being done by several other states. If a cas and it is more than 30 days past the date of their first positive test (or onset of symptoms) then an individual is considered recove
