# **COVID-19 Data for Pennsylvania**

Page last updated: 12:00 p.m. on 2/24/2021

Total Cases*	Negatives**	Recovered***	Total PCI
920,634	3,843,793	90%	10,190

Total cases, negatives, and recovered represent unique individuals. Total PCR Tests can include numerous tests for the same individual.

\* Total case counts include confirmed and probable cases.

\*\* Negative case data only includes negative PCR tests. Negative case data does not include negative antibody tests.

\*\*\* Individuals who have recovered is determined using a calculation, similar to what is being done by several other states. If a case has not been rej

and it is more than 30 days past the date of their first positive test (or onset of symptoms) then an individual is considered recovered.

## **About Our Data**

The administration's decisions surrounding the managing of the COVID-19 pandemic are data-driven, literature-based and follow established public health practices. The department uses statewide and national data as well as peer-reviewed literature, and guidance from the CDC and White House when making public health decisions. Decisions are based on science and facts.

# **COVID-19 Dashboard**

The COVID-19 Dashboard, which is updated each day at noon, discloses the number of confirmed and probable cases, negative test results, deaths, ZIP-code level data, hospital preparedness, and case and death demographics. This information is also available for download.

Note: The COVID-19 Data Dashboard does not load properly in Internet Explorer. It is recommended to use Chrome, Edge or Firefox to view the dashboard.

# **Hospital Information**

With cases of COVID-19 on the rise, Pennsylvania will continue to monitor our hospitals using several metrics and begin interventions when those metrics are met.

# Vaccine Dashboard

As COVID-19 Vaccine distribution begins in Pennsylvania, this dashboard shows where vaccine has been administered and the demographics of those receiving vaccine.

Disclaimer: Beginning on 1/19/2021, the counts in the table and map on the Vaccines by County page now represent the number of people vaccinated. Prior to 1/19/2021, these counties represented the number of vaccinations administered.

Note: Pennsylvania residents who receive a COVID-19 vaccination from a clinic located in Philadelphia county, or received a vaccination from a federal facility (such as a Veteran Health Administration hospital or a federal prison), or who received a vaccination in another state are not included in this dashboard due to separate reporting requirements.

# **Updated Case and Death Information**

#### **County Case Counts to Date**

Each day the Department of Health provides updated case, testing, and death information. Archived information dating back to the beginning of the pandemic is also available. Case counts are displayed by the date that the cases were first reported to the PA-NEDSS surveillance system. Case counts by date of report can vary significantly from day to day for a variety of reasons. In addition to changes due to actual changes in disease incidence, trends are strongly influenced by testing patterns (who gets tested and why), testing availability, lab analysis backlogs, lab reporting delays, new labs joining our electronic laboratory reporting system, mass screenings, etc. Trends need to be sustained for seven to 14 days before any conclusions can be made regarding the progress of the pandemic. Source: Pennsylvania National Electronic

Disease Surveillance System (PA-NEDSS) as of 10:00 PM on 2/23/2021.

• County case counts by date

#### **Death Data**

This information has been extracted from death records registered with the Department's Vital Records Program as of 11:59 pm on 2/23/2021.

## **Long-Term Care Facility Data**

Long-term care facility by county is updated each day at noon and long-term care facilities by facility updated each Tuesday. Use this data to see COVID-19 cases associated with long-term care facilities, to date.

## **Multisystem Inflammatory Syndrome Data**

Multisystem inflammatory syndrome in children (MIS-C) is a condition where different body parts can become inflamed, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs. We do not yet know what causes MIS-C. Many children with MIS-C had the virus that causes COVID-19, or had been around someone with COVID-19.

# **OpenData**

The Department of Health has made case, death, and hospitalization data available since the beginning of the pandemic through the commonwealth's OpenData platform.

- Cases
- Deaths
- Hospitalizations

The commonwealth's OpenData platform also shows how the commonwealth's public-facing services are providing relief and support to those in need at this time. Information included is data from the Department of Labor & Industry regarding unemployment compensation, data from the Department of Human Services on its Office of Income Maintenance Call Center, and data from the Department of Health on calls to the 1-877-PA-HEALTH line.

View additional data animations by region and county.

# **Carnegie Mellon Decision Tools**

The administration works with Carnegie Mellon University to develop decision tools that help provide input to decision making. The decision tool is updated twice-weekly. The most recent CMU report is always embedded here. View archived reports by date below.

# **External Resources**

## CHOP Policy LAB: Mapping COVID-19 In Your Community

The Children's Hospital of Philadelphia and the University of Pennsylvania developed a <u>resource to track and</u> <u>model COVID in the United States</u>. According to CHOP, the team used data from a variety of publicly available sources, the researchers built their model to observe how social distancing, population density, and daily temperatures affect the number and spread of COVID-19 infections over time across a county, accounting for test positivity rates and population characteristics, such as age, insurance status and smoking prevalence.

#### **COVIDcast Real-Time COVID-19 Indicators**

Carnegie Mellon University, along with partners, developed <u>COVIDcast</u>. It provides data, modeling, and tracking for the COVID pandemic.

#### **CDC Reports**

View nationwide COVID-19 data in the CDC's Morbidity and Mortality Weekly Report.

## Projections from Institute for Health Metrics and Evaluation

Instute for Health Metrics and Evaluation (IHME) <u>produces COVID-19 projections</u> that were developed in response to requests from the University of Washington School of Medicine and other US hospital systems and state governments working to determine when COVID-19 would overwhelm their ability to care for patients.
