COVID-19 Data for Pennsylvania

Page last updated: 12:00 p.m. on 4/3/2021

Total Cases*	Negatives**	Recovered***	
1,038,749	**4,162,432**	**90**%	

Total cases, negatives, and recovered represent unique individuals. Total PCR Tests can include numerous tests for the same individual.

* Total case counts include confirmed and probable cases.

** Negative case data only includes negative PCR tests. Negative case data does not include negative antibody tests.

*** Individuals who have recovered is determined using a calculation, similar to what is being done by several other states. If a case has not been re

30 days past the date of their first positive test (or onset of symptoms) then an individual is considered recovered.

About Our Data

The administration's decisions surrounding the managing of the COVID-19 pandemic are data-driven, literature-based and follow established public health practices. The department uses statewide and national data as well as peer-reviewed literature, and guidance from the CDC and White House when making public health decisions. Decisions are based on science and facts.
