#### **Situation Summary**

In December 2019, a new (or novel) human coronavirus (SARS-CoV-2) type emerged in China. At this time, it's unclear how easily this virus is spreading between people. Patients with confirmed COVID-19 infection have reportedly had mild to severe respiratory illness with symptoms of fever, cough, and shortness of breath appearing anywhere from 2 to 14 days after exposure. Learn more about coronaviruses, how they present, and how they are tested by visiting Human Coronaviruses.

This is an emerging, rapidly evolving situation. The Alabama Department of Public Health (ADPH) is providing updated information and guidance on this website, as well as, Facebook and Twitter, as it becomes available.
