CDC Case Counts

Thank you for your patience while this page loads. Embedded content brought to you through CDC content syndication:

COVID-19 Case Counts: CDC Content Syndication

Cases of COVID-19 Reported in the US, by Source of Exposure*†

Cases of COVID-19
Reported in the US, by
Source of Exposure

Travel-related	337
Close contact	321
Under investigation	14,561
Total cases	15,219

* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020 with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

† CDC is no longer reporting the number of persons under investigation (PUIs) that have been tested, as well as PUIs that have tested negative. Now that states are testing and reporting their own results, CDC's numbers are not representative of all testing being done nationwide.
