

COVID-19 Update March 29, 2020

As of **March 29, 2020**, a total of **1993** laboratory-confirmed cases of COVID-19 have been reported among Connecticut residents (Table 1). **Thirty-four** residents have died (**21** in Fairfield County, **6** in New Haven County, **4** in Tolland County, **2** in Hartford County, and **1** in Middlesex County).

Four hundred and four patients are currently hospitalized. The increase in hospitalizations compared to prior reports reflects a change to provide the most up to date information from the Connecticut Hospital Association. Please note the distribution by county is based on where hospitals are located, not where patients reside.

Laboratory Surveillance

The Dr. Katherine A. Kelley State Public Health Laboratory has tested a total of **1,761** patients for COVID-19; **279 (19%)** patients tested positive. The graph below shows the number of patients tested by date specimens were received. Hospital and commercial laboratories also are offering testing for COVID-19 in Connecticut; in total, more than **11,900** tests have been reported to date.

**Testing of specimens received since March 26 is on-going and does not reflect a decrease in testing.*

Syndromic Surveillance

The Department of Public Health has two syndromic surveillance systems that track respiratory illness across the state. The hospital syndromic surveillance system receives near real-time information about emergency department (ED) visits from all 38 licensed, hospital EDs in Connecticut. ILI-Net receives the percentage of patient visits with influenza-like illness (ILI) from a network of outpatient healthcare providers. Due to the ongoing COVID-19 pandemic, both syndromic surveillance systems suggest that more people may be seeking care for respiratory illness than usual at this time. For more information, please see the [Weekly Influenza Update](#).
