

COVID-19 Update April 09, 2020

As of **April 09, 2020**, a total of **9784** laboratory-confirmed cases of COVID-19 have been reported among Connecticut residents (Figure 1). **One thousand four hundred sixty-four** patients are currently hospitalized. There have been **380** laboratory-confirmed COVID-19-associated deaths.

Day-to-day changes reflect newly reported cases, deaths, and tests that occurred over the last several days to week. All data in this report are preliminary; data for previous dates will be updated as new reports are received and data errors are corrected. Hospitalization data were collected by the Connecticut Hospital Association. Deaths* reported to either the OCME or DPH are included in the daily COVID-19 update.

*For public health surveillance, laboratory-confirmed COVID-19-associated deaths are defined as patients who tested positive for COVID-19 around the time of death; this is not a determination of the cause of death.

Overall Summary	Total	Change Since Yesterday
Laboratory-Confirmed COVID-19 Case	9784	+1003
Laboratory-Confirmed COVID-19-Associated Deaths	380	+45
Patients Currently Hospitalized with COVID-19	1464	+46
Patients tested for COVID-19	33502	+1802

COVID-19 Cases and Associated Deaths by County of Residence

As of 04/09/20 12:00pm. Includes patients tested at the State Public Health Laboratory, hospital, and commercial laboratories.

County	Laboratory-Confirmed COVID-19 Cases	Laboratory-Confirmed COVID-19-Associated Deaths
Fairfield County	4882	178
Hartford County	1471	75
Litchfield County	315	13
Middlesex County	205	14
New Haven County	2183	78
New London County	139	6
Tolland County	145	13
Windham County	52	1
Pending address validation	392	2
Total	9784	380

[National COVID-19 statistics](#) and information about [preventing spread of COVID-19](#) are available from the Centers for Disease Control and Prevention.

Syndromic Surveillance

The Department of Public Health EpiCenter hospital emergency department (ED) syndromic surveillance system receives near real-time information from all 38 licensed, hospital EDs in Connecticut. The percentage of individuals seeking care for “unexplained fever/flu” syndrome ED visits is monitored to identify individuals that may have symptoms consistent with COVID-19; this differs from the “fever/flu” syndrome in the weekly influenza report since patients with a known diagnosis (e.g., influenza, strep throat) are not included. **The syndromic surveillance systems suggest that many more people are seeking care for respiratory illnesses, including COVID-19, in the past four weeks.**

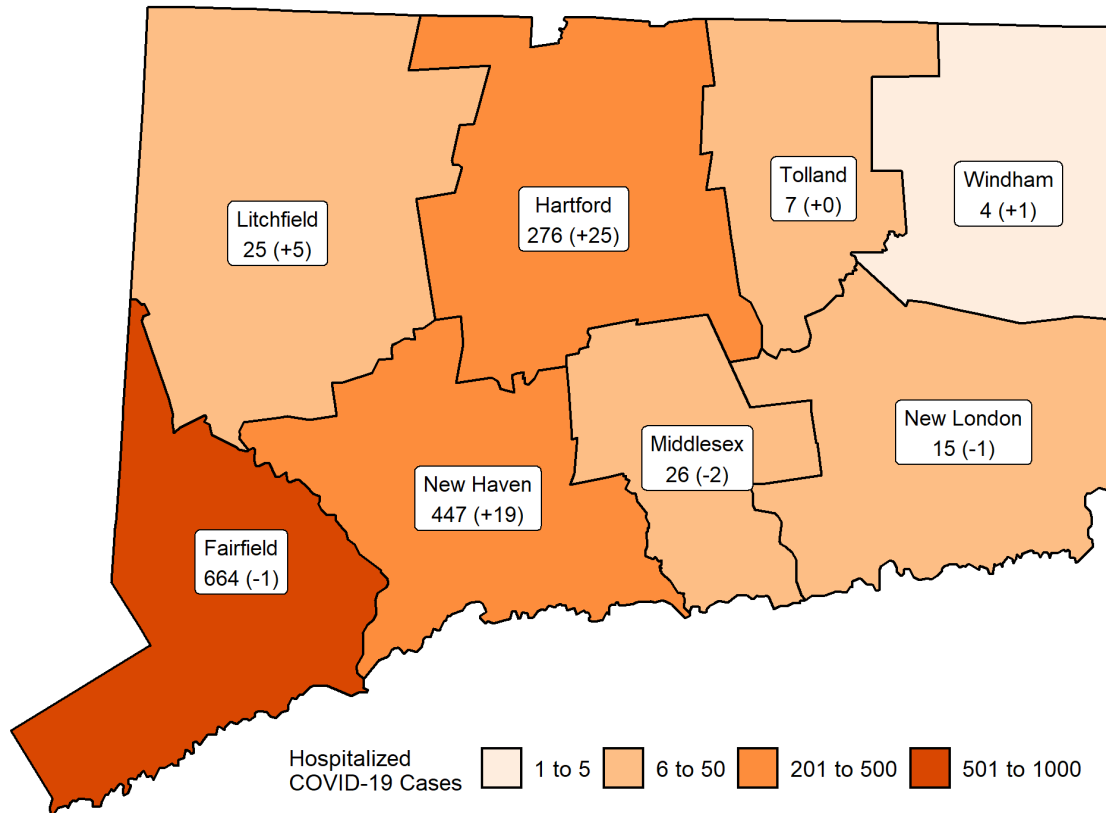

Hospitalization Surveillance

The map below shows the number of patients currently hospitalized with laboratory-confirmed COVID-19 by county based on data collected by the Connecticut Hospital Association. The distribution is by location of hospital, not patient residence. The labels indicate the number of patients currently hospitalized with the change since yesterday in parentheses.

Patients Currently Hospitalized by Connecticut County

Distribution by location of hospital not patient residence. Data from the Connecticut Hospital Association.

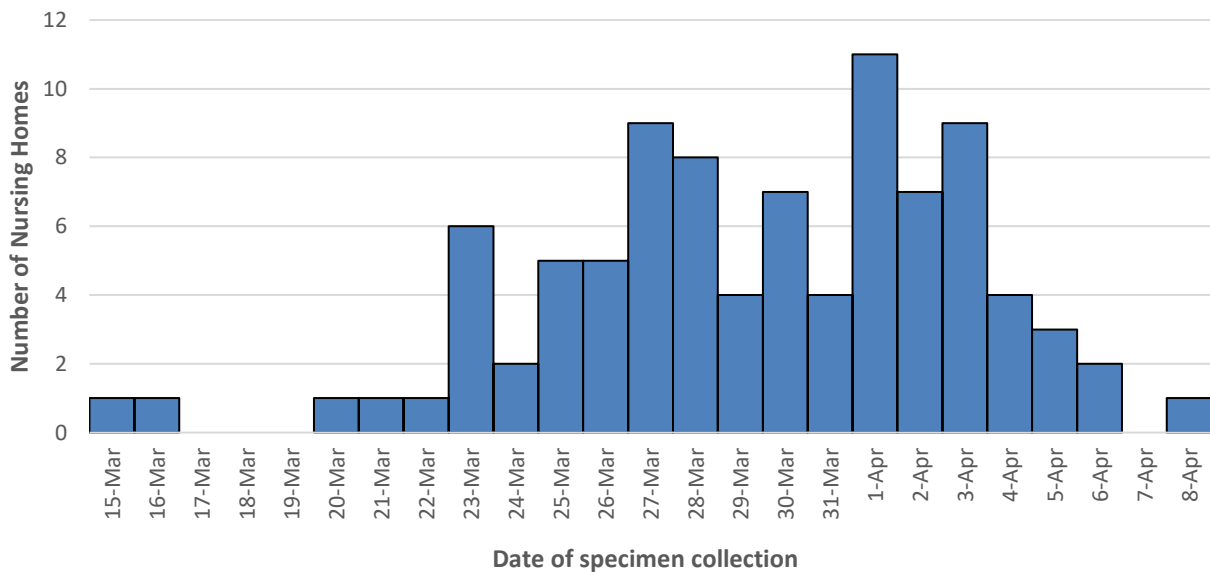

More information about hospitalized cases of COVID-19 in New Haven and Middlesex Counties is available from [COVID-NET](#).

Nursing Home Surveillance

Among **215** nursing homes in CT, **92 (43%)** have had at least one confirmed case of COVID-19. A total of **849** nursing home residents with laboratory-confirmed COVID-19 have been identified of whom **241 (28%)** were hospitalized and **116 (14%)** have died. The graph below shows the number of nursing homes with laboratory confirmed COVID-19 cases by the first date a positive specimen was collected.

Number of Nursing Homes with Laboratory-confirmed COVID-19 among Residents by Date of First Positive Specimen Collection*

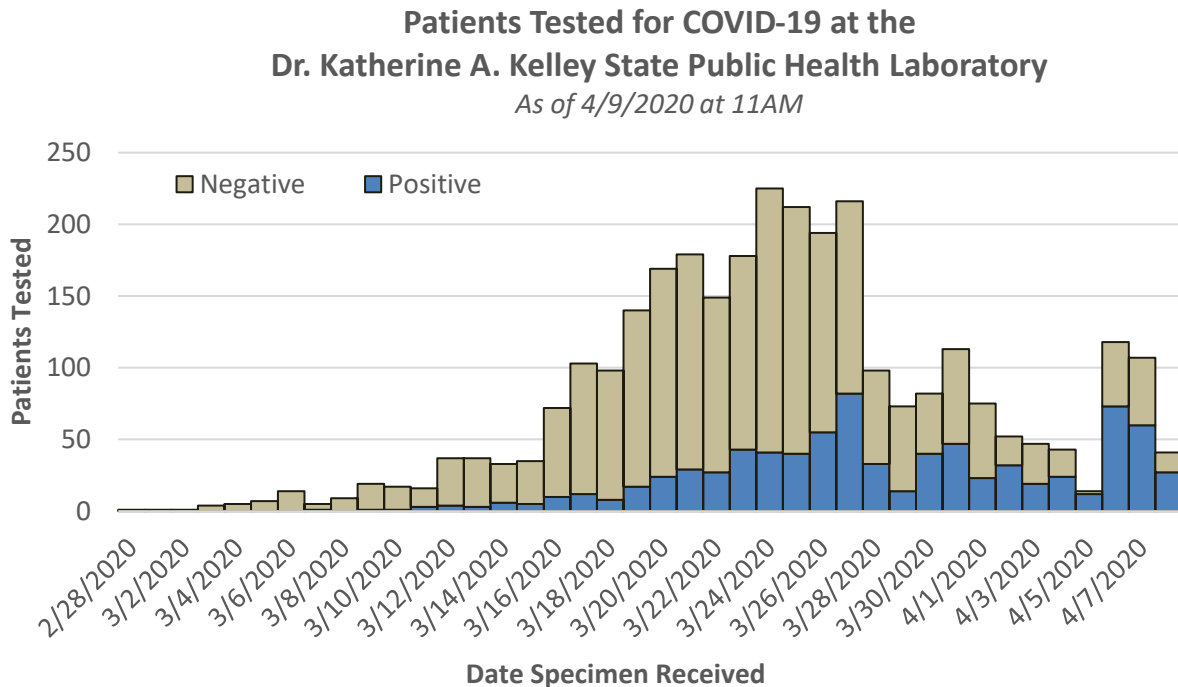

As of 04/09/2020 at 8:30am

**Test results may be reported several days after the result. Data from previous dates are routinely updated.*

Laboratory Surveillance

The Dr. Katherine A. Kelley State Public Health Laboratory has tested a total of **2986** patients for COVID-19; **810 (27%)** patients tested positive. The graph below shows the number of patients tested by date specimens were received. Hospital and commercial laboratories also are offering testing for COVID-19 in Connecticut; in total, more than **33502** tests have been reported to date.

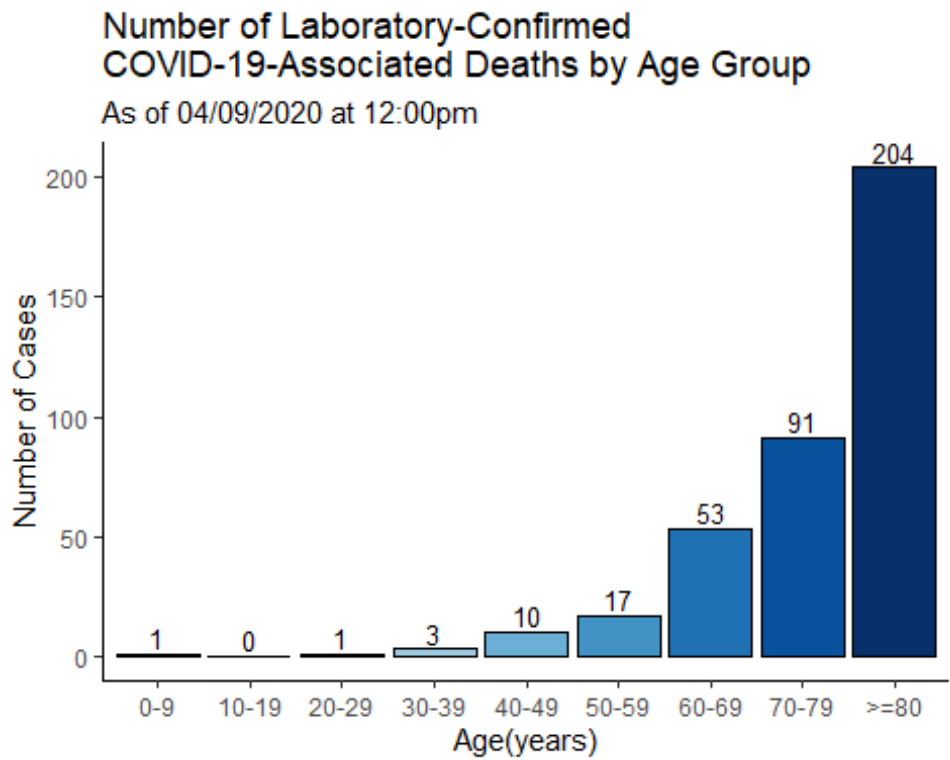

Testing of specimens received since April 8 is on going and does not reflect a decrease in testing.

Characteristics of Laboratory-Confirmed COVID-19 Cases and Associated Deaths

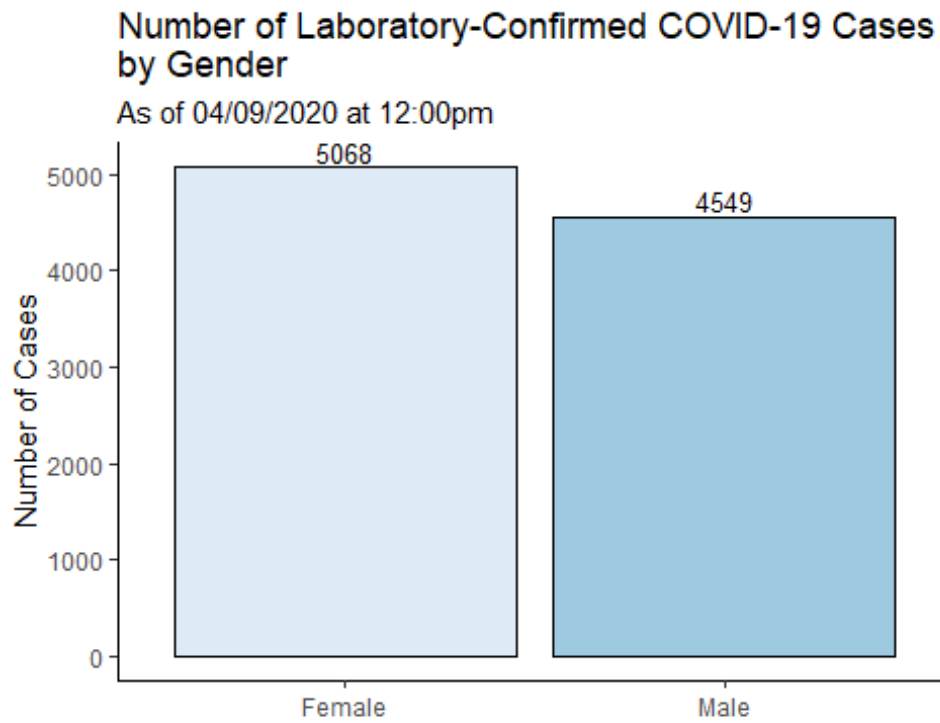

Test results may be reported several days after the result. Data are incomplete for most recent dates shaded in grey. Data from previous dates are routinely updated.

Counts may not add up to total case count as demographic data may be missing.
