COVID-19 Update June 26, 2020

As of **June 25, 2020, at 8:30 PM**, the total of laboratory-confirmed and probable COVID-19 cases reported among Connecticut residents is **46059**, including **44086** laboratory-confirmed and **1973** probable cases. **One hundred twenty-seven** patients are currently hospitalized with laboratory-confirmed COVID-19. There have been **4307** COVID-19-associated deaths.

In Connecticut during the early months of this pandemic, it became increasingly clear that it would be necessary to track probable COVID-19 cases and deaths, in addition to laboratory-confirmed (RT-PCR) cases and deaths. This was needed to better measure the burden and impact of this disease in our communities and is now part of the national surveillance case definition for COVID-19. Probable cases of COVID-19 involve persons who have not had confirmatory laboratory testing (RT-PCR) performed for COVID-19, but whose symptoms indicate they are likely to have a COVID-19 infection. In Connecticut, most of the probable COVID-19 cases involve persons whose death certificates list COVID-19 disease or SARS-CoV-2 as a cause of death or a significant condition contributing to death. Prior to June 1, probable and confirmed cases were reported together.

Overall Summary	Total**	Change Since Yesterday
COVID-19 Cases	46059	+65
COVID-19-Associated Deaths	4307	+9
Patients Currently Hospitalized with COVID-19	127	+5
COVID-19 PCR Tests Reported	414889	+7922

**Includes confirmed plus probable cases

COVID-19 Cases and Associated Deaths by County of Residence
As of 06/25/20 8:30pm. Includes patients tested at the State Public Health Laboratory, hospital, and commercial laboratories.

County	COVID-19 Cases		COVID-19-Associated Deaths	
	Confirmed	Probable	Confirmed	Probable
Fairfield County	15931	633	1070	305
Hartford County	10835	676	1053	312
Litchfield County	1408	63	116	20
Middlesex County	1222	60	143	39
New Haven County	11862	392	919	150
New London County	1161	62	76	26
Tolland County	834	70	50	14
Windham County	591	7	13	1
Pending address validation	242	10	0	0
Total	**44086**	**1973**	**3440**	**867**

National COVID-19 statistics and information about preventing spread of COVID-19 are available from the Centers for Disease Control and Prevention.

All data are preliminary and subject to change. Last updated 6/26/2020

Day-to-day changes reflect newly reported cases, deaths, and tests that occurred over the last several days to week. All data in this report are preliminary; data for previous dates will be updated as new reports are received and data errors are corrected. Hospitalization data were collected by the Connecticut Hospital Association. Deaths reported to either OCME or DPH are included in the daily COVID-19 update.

Hospitalization Surveillance

The map below shows the number of patients currently hospitalized with laboratory-confirmed COVID-19 by county based on data collected by the Connecticut Hospital Association. The distribution is by location of hospital, not patient residence. The labels indicate the number of patients currently hospitalized with the change since yesterday in parentheses.

**Patients Currently Hospitalized by Connecticut County**
Distribution by location of hospital not patient residence. Data from the Connecticut Hospital Association.
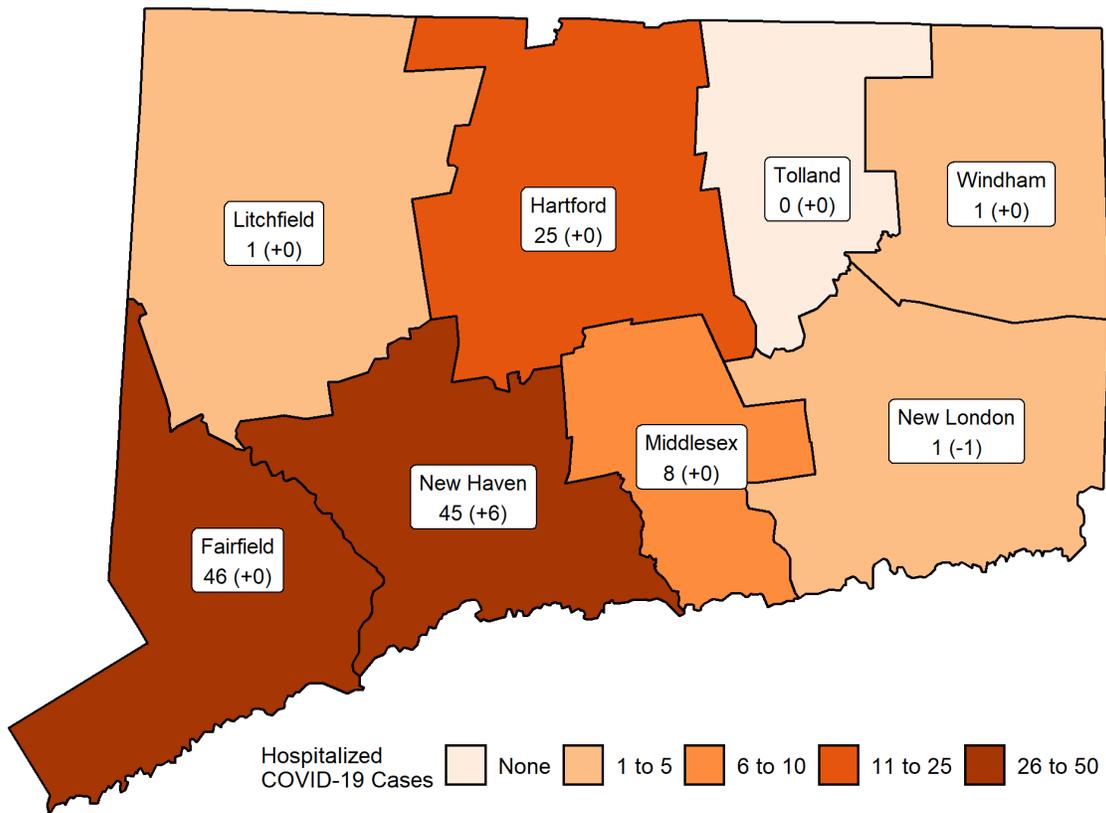

More information about hospitalized cases of COVID-19 in New Haven and Middlesex Counties is available from COVID-NET.

Characteristics of COVID-19 Cases and Associated Deaths

Test results may be reported several days after the result. Data are incomplete for most recent dates shaded in grey. Data from previous dates are routinely updated.

Number of Confirmed and Probable COVID-19 Cases by Date
As of 06/25/2020 at 8:30pm

Date of Specimen Collection (confirmed) or Symptom Onset (probable)

Confirmed Probable

Number of COVID-19-Associated Deaths by Date of Death
As of 06/25/2020 at 8:30pm

APPENDIX B. The following graphs show the number of cases and deaths by race and ethnicity. *Categories are mutually exclusive. The category "multiracial" includes people who answered 'yes' to more than one race category. NH=Non-Hispanic*

Number of COVID-19 Cases by Race\Ethnicity
As of 06/25/2020 at 8:30pm

Number of Cases:
- Hispanic: 8655
- NH American Indian or Alaskan Native: 42
- NH Asian or Pacific Islander: 669
- NH Black: 6037
- NH Multiracial: 120
- NH Other: 252
- NH White: 16051
- Unknown: 14233

Number of COVID-19-Associated Deaths by Race\Ethnicity
As of 06/25/2020 at 8:30pm

Number of Deaths:
- Hispanic: 370
- NH American Indian or Alaskan Native: 2
- NH Asian or Pacific Islander: 45
- NH Black: 642
- NH Multiracial: 26
- NH Other: 15
- NH White: 3145
- Unknown: 62

All data are preliminary and subject to change. Last updated 6/26/2020

The following graphs show the number of COVID-19 cases and COVID-19-associated deaths per 100,000 population by race and ethnicity. Crude rates represent the total cases or deaths per 100,000 people. Age-adjusted rates consider the age of the person at diagnosis or death when estimating the rate and use a standardized population to provide a fair comparison between population groups with different age distributions. Age-adjustment is important in Connecticut as the median age of among the non-Hispanic white population is 47 years, whereas it is 34 years among non-Hispanic blacks, and 29 years among Hispanics. Because most non-Hispanic white residents who died were over 75 years of age, the age-adjusted rates are lower than the unadjusted rates. In contrast, Hispanic residents who died tend to be younger than 75 years of age which results in higher age-adjusted rates.

The 2018 Connecticut and 2000 US Standard Million populations were used for age adjustment; population estimates from: DPH Population Statistics. *Categories are mutually exclusive. Cases missing data on race/ethnicity are excluded from calculation of rates. NH=Non-Hispanic*

Rate of COVID-19 Cases by Race/Ethnicity, with and without age adjustment
As of 06/25/2020 at 8:30pm

Rate of COVID-19-Associated Deaths by Race/Ethnicity, with and without age adjustment*
As of 06/25/2020 at 8:30pm

Age adjusted rates only calculated for groups with at least 30 deaths
