### Summary

As of October 8, 2020, there have been 2,934 cases of COVID-19 reported on Guam. Sixty-six (66) new cases of COVID-19 were reported to DPHSS on October 7: 65 confirmed cases and 1 probable case.

New confirmed cases reported today: 38 cases tested positive at GPHL, 11 tested positive at DLS, 5 tested positive at AMC, 5 tested positive at DoD, 4 tested positive at GMHA, and 2 tested positive at GRMC.

New probable cases reported today: 1 case tested positive by antigen testing at IHP.

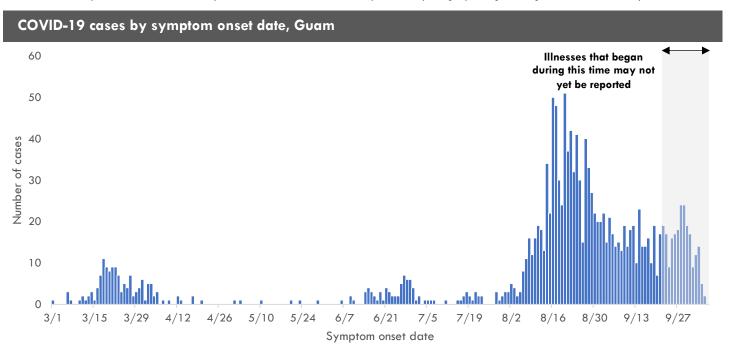

Twenty-four (24) cases were identified through contact tracing. Six cases reported recent travel from the US and were identified in quarantine. One hundred and forty-three (143) cases were reported released from isolation.

COVID-19 Cases
Primary Reported Residence

COVID-19 Testing on Guam**	Total	New tests reported today	Percent positive
COVID-19 Tests	54,261	584	5.4%
Molecular Tests	54,055	578	5.4%
Serology Tests	192	1	1.6%
Antigen Tests	14	5	35.7%

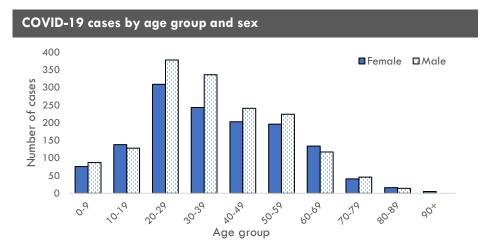

<sup>\*\*</sup>See COVID-19 Testing Breakdown for all testing definitions. New tests reported reflects the number of tests reported to DPHSS since the previous report and does not necessarily indicate the number of samples run in the same time frame. Complete test reporting is pending for antigen tests conducted on 9/29.

Case Breakdown					
Status	Sex			Current isolation location	
COVID-19 deaths	57	Female	1,361	Hospital	44
Cases in active isolation†	810	Male	1,573	Home	676
Cases not in isolation§	2,067	Age Group		Isolation facility	64

ldentified in quarantine	133	90+	7	South	391
Note: Data for recent cases are preliminary and are updated based on findings from case				Homeless	4

Note: Data for recent cases are preliminary and are updated based on findings from case investigations. Residence under investigation for 61 cases.

† Cases that test positive for COVID-19 through follow-up molecular testing return to active isolation.

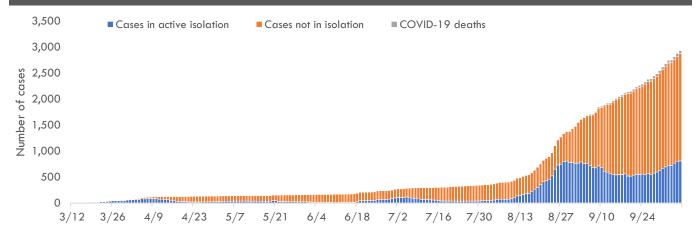

Non-resident

§ Cases not in isolation indicates the number of COVID-19 cases that are no longer in active isolation based on criteria outlined on page 4. Generally, the criteria assess time since COVID-19 symptom resolution and the date of their most recent positive diagnostic test to qualify for release from isolation.

 $\P$  In the 14 days before symptom onset. Some cases traveled to more than one country.

\*\* Some cases have more than one link to other COVID-19 cases.

### Number of cases in active isolation, cases not in isolation, and COVID-19 deaths, Guam

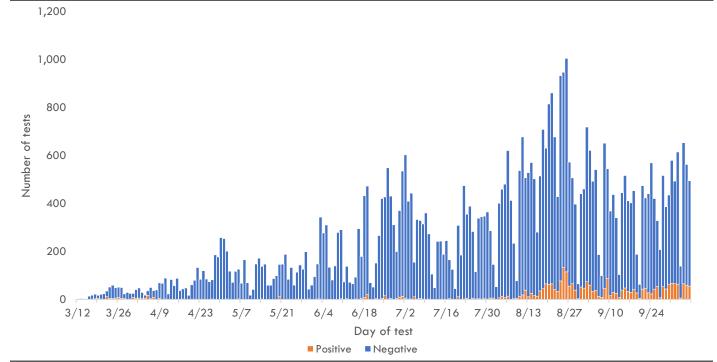

### **COVID-19 TESTING BREAKDOWN**

MOLECULAR TESTS	TOTAL	TOTAL POSITIVES*	NEW TESTS	NEW POSITIVES

Total tests is defined as the number of tests with conclusive results not including follow-up testing for known COVID-19 cases. New tests reported today is defined as the total tests reported to DPHSS since the last Situation Report. Percent positive is defined as number of people with a positive test result, out of all people with COVID-19 testing. Total positives is defined as the number of people with a positive test result.

### COVID-19 testing by day of test, Guam

CONTACT INVESTIGATIONS	TOTAL	10/7/20
Contacts identified by DPHSS	9,111	112
Contacts tested by DPHSS	3,353	23
Cases identified through contact tracing	1,0 <i>77</i>	24
Cases identified through contact tracing	1,077	24

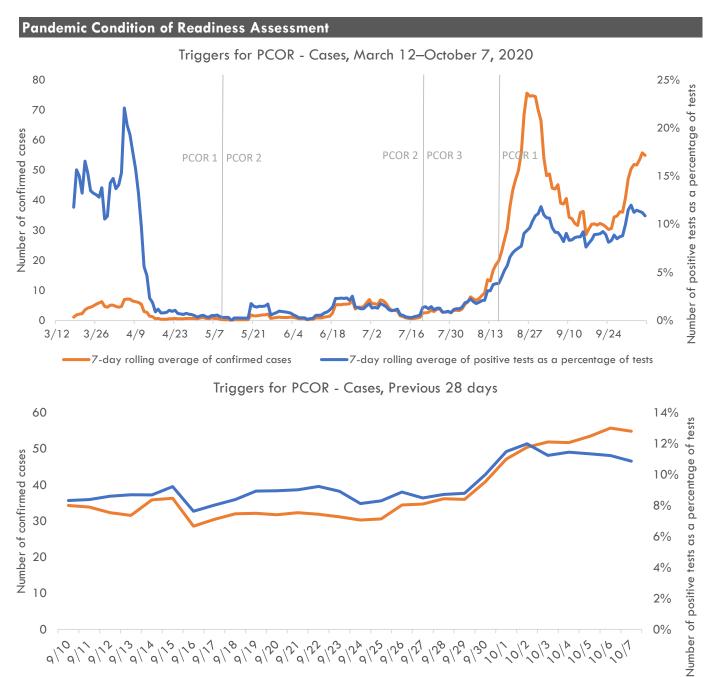

Note: Data for recent cases are preliminary and are updated based on findings from case investigations.

<sup>\*</sup>Two additional confirmed cases tested positive through molecular testing at an out-of-state laboratory.

<sup>\*\*</sup>Clinics included: American Medical Center, Guam Medical Care, Guam Radiology Consultants, and One Love Pediatrics.

<sup>\*\*\*</sup>Clinics included: Guam Medical Care and IHP Medical Group.

#### † Criteria for release from isolation

For persons with mild to moderate illness who are not severely immunocompromised:

7-day rolling average of confirmed cases

For persons having symptoms: At least 3 days have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath) and any other symptoms attributed to COVID-19 AND at least 10 days have passed since symptoms first appeared—or since recurrent symptoms appeared—AND at least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test.

7-day rolling average of positive tests as a percentage of tests

For persons without symptoms: At least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test assuming they have not subsequently developed symptoms since their positive test.

For persons with severe to critical illness or who are severely immunocompromised:

For persons having symptoms: At least 10 days have passed since symptoms first appeared, up to 20 days.

For persons without symptoms: At least 10 days have passed since the date of their first positive COVID-19 diagnostic test, up to 20 days.
