Coronavirus Disease 2019 (COVID-19)

The Guam Department of Public Health and Social Services (DPHSS) is closely monitoring the outbreak of a novel coronavirus causing respiratory illness that originated in Wuhan City, Hubei Province, China in December 2019. On February 11, 2020, the World Health Organization (WHO) named the disease "coronavirus disease 2019" (abbreviated "COVID-19"). As of March 17, 2020 there are three (3) confirmed cases of COVID-19 on Guam. The entire Government of Guam has implemented its planned COVID-19 response to identify and contain transmission on the island. The community can do their part by limiting social interactions, following basic cough and hand-washing etiquette, and staying home when sick (even mildly). The number of confirmed cases globally is approximately 167,000 across 151 countries/territories/areas. South Korea, Italy, and Iran have the most confirmed cases outside of China. This is a rapidly evolving situation so the information on this page is subject to frequent change. For the most up-to-date and reliable information, please refer to the U.S. Centers for Disease Control and Prevention (CDC) website: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>.

COVID-19:
AS OF 3AM • MARCH 16, 2020
SCHOOLS, NONESSENTIAL GOVGUAM OPERATIONS
SUSPENDED

COVID-19 UPDATES

MARCH 16, 2020

DPHSS HOTLINE NUMBERS FOR MEDICAL-RELATED QUESTIONS ONLY 6AM - 10PM

**DPHSS HAS CREATED AN INFORMATIONAL HOTLINE FOR
THOSE LOOKING TO GET THEIR QUESTIONS ANSWERED
ABOUT COVID-19.**

**REGISTERED NURSES WILL ANSWER YOUR QUESTIONS.
HOTLINE NUMBERS ARE:**

480-7859 • 480-6760 • 480-6763 • 480-7883

**THIS HOTLINE IS FOR MEDICAL-RELATED QUESTIONS ONLY.
FOR ALL OTHER QUESTIONS, PLEASE CALL THE
JOINT INFORMATION CENTER AT GUAM HOMELAND SECURITY**

COVID-19 Guidelines on Guam

On March 14, 2020, Governor Lourdes A. Leon Guerrero declared a State of Emergency on Guam to respond to COVID-19. Here's what this means for Guam:

Work and School:

- Until March 30, 2020, all non-essential government of Guam offices are closed and the services they offer suspended. If you are essential personnel, you will be contacted by

appropriate supervisors to report to work.

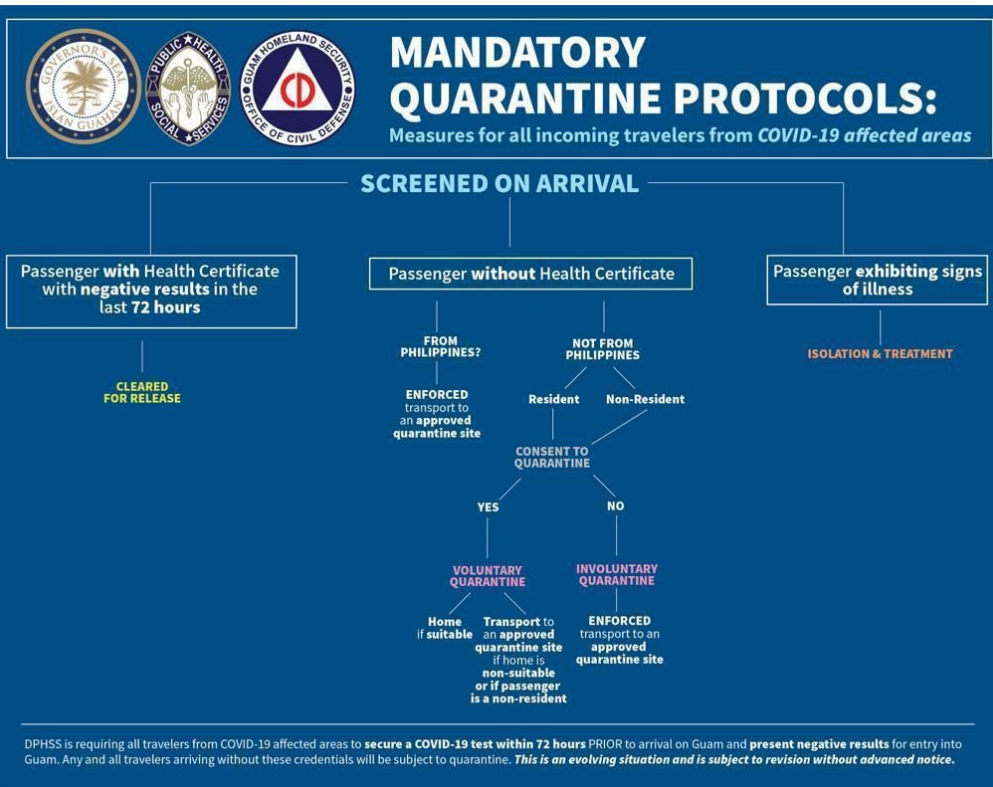

- All public and private schools on Guam (pre-K through 12th grade) are closed until March 30, 2020. Student absences connected to the transmission of COVID-19 will not be counted for truancy.
- Places of business with more than 50 people in attendance shall have no more than 50% occupancy and seat no more than 50% of capacity. This does not apply to businesses providing food or necessities (e.g., grocery and convenience stores), hospitals, pharmacies, or other medical offices/facilities. This Order is not intended to prohibit routine business gatherings held at the place of business.

Social Activities:

- Gatherings of 50 people or more in a single room or single space at the same time for social, spiritual, and recreational activities are prohibited. This includes, but is not limited to: community, civic, public, leisure, faith-based, or sporting events, parades, concerts, festivals, fiestas, conventions, fundraisers, and similar activities.
- Social distancing of at least 6 feet, frequent cleaning of all services, posting signs, and permitting/encouraging teleworking are all expected.
- Older residents with pre-existing medical conditions should limit excursions away from home of any type.

Travel:

- All travelers to Guam shall will be quarantined for 14 days upon arrival unless they possess a DPHSS certified document that proves they are not infected with COVID-19
- Guam residents and those with ties to the community will be permitted to self-quarantine at home if the home is deemed suitable. Otherwise, travelers will be transported to an approved quarantine site.
- EXCEPTION: ALL travelers from the Philippines who do not have a DPHSS-certified document will be transported to an approved quarantine site.
- Any and all costs associated with this quarantine and/or treatment will be the responsibility of the individual.

Please see Executive Order 2020-04 (attached above) for the specific guidelines issued by the Governor's office.

COVID-19 PRESS RELEASES AND EXECUTIVE ORDERS

- Press Release- March 18, 2020: 3 Test Positive for COVID-19; Practice Social Distancing, Older Adults Most at Risk
- Press Release- March 18, 2020: Public Health Updates 2020
- Press Release- March 18, 2020: Department of Revenue and Taxation Operations
- Press Release- March 18, 2020: Travel Guidance and Quarantine Protocol in Accordance with Governor's Executive Order
- Press Release- March 17, 2020: Two New Cases Test Positive for COVID-19
- Press Release- March 17, 2020: DPHSS Continues to Provide Some Services; Update on Behavioral Health Services
- Press Release- March 16, 2020: Unverified Messages Circulating; DPHSS Medical Information Phone Lines Available

What Older Adults Need to Know

Elderly individuals and those with comorbidities (chronic diseases or other sicknesses) are most vulnerable to adverse health outcomes from COVID-19. Here is what you need to know to keep them safe.

The Basics

COVID-19 is a respiratory disease caused by a novel (new) coronavirus. Coronaviruses are a large family of viruses that are typically found in animals, but in some instances, can infect humans and spread by person-to-person transmission, which is happening with COVID-19. Both MERS and SARS were coronaviruses that originated in bats. COVID-19 originated in Wuhan, China and the vast majority of the confirmed cases across the world are located there. Patients testing positive for COVID-19 have also been identified in 28 other countries, including the Philippines, Japan, and United States. Severity of the disease ranges from mild, cold-like symptoms to death. Continue reading for more information.

PHYSICIAN'S ALERT

UPDATED COVID-19 PUI CRITERIA AND TESTING: March 12, 2020

On March 4, 2020, the Centers for Disease Control and Prevention (CDC) broadened its criteria for evaluating persons under investigation (PUI) for COVID-19 as access to COVID-19 testing expands to more locations.

As of March 12, 2020, testing for SARS-CoV-2, the virus that causes the COVID-19 illness, will be available at the Guam Public Health Lab (GPHL). As DPHSS continues to monitor for possible cases of COVID-19 and to keep our community safe, GPHL will test specimens from patients who meet the following criteria:

1. COVID-19 PUI- "Patients with symptoms of COVID-19 and are at high risk."

- Hospitalized patients with:
 - Fever and signs/symptoms of a lower respiratory illness (e.g., cough or shortness of breath) AND a history of travel from affected geographic areas within 14 days of symptom onset
 - Fever with severe acute lower respiratory illness (e.g., pneumonia, acute respiratory disease syndrome [ARDS]) without alternative explanatory diagnosis (e.g., influenza)
- Persons with clinical signs/symptoms of COVID-19 who have had close contact with a laboratory confirmed COVID-19 patient within 14 days of symptom onset

2. SURVEILLANCE CASE- "Patients that a clinician has judged should be tested, but does not meet the COVID-19 PUI criteria."

- Surveillance cases of COVID-19 will be evaluated on a case-by-case basis. Testing of surveillance cases may be capped based on testing availability. Clinicians should work with DPHSS to coordinate testing through GPHL. Clinicians should use their judgement to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Most patients with confirmed COVID-19 have developed fever and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). Clinicians are strongly encouraged to test for other causes of respiratory illness (e.g., influenza).

Priorities for testing surveillance cases include:

- Symptomatic individuals such as older adults (age ≥ 65 years) and individuals with chronic medical conditions and/or an immunocompromised state that may put them at higher risk for poor outcomes (e.g., diabetes, heart disease, receiving immunosuppressive medications, chronic lung disease, chronic kidney disease).
- Any persons including health care personnel, who within 14 days of symptoms onset had close contact with a suspect or laboratory-confirmed COVID-19 patient, or who have a history of travel from affected geographic areas within 14 days of symptoms onset.

Mildly ill patients should be encouraged to stay home and contact their healthcare provider by phone for

guidance about clinical management. Patients who have severe symptoms, such as difficulty breathing, should seek care immediately. Older patients and individuals who have underlying medical conditions or are immunocompromised should contact their physician early in the course of even mild illness.

After Identifying a PUI

If a patient meets the PUI or surveillance case criteria described above, providers should immediately notify DPHSS and implement recommended infection prevention and control practices (<https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html>) as well as notify infection control personnel at the health care facility.

Once a PUI or surveillance case has been determined, health care personnel (HCP) should collect specimens required for COVID-19 testing: one (1) nasopharyngeal (NP) swab. HCP collecting specimens for COVID-19 testing from PUIs and surveillance cases should adhere to Standard, Contact, and Airborne Precautions, including the use of eye protection. These procedures should take place in an Airborne Infection Isolation Room (AIIR) or in an examination room with the door closed. Please follow GPLH's guidelines for proper Specimen Collection, Submission, and Transport.

A patient who has been identified as a PUI will be isolated at a health care facility. DPHSS will begin contact tracing (tracking down contacts of the PUI and ask them to stay home in order to prevent the illness from spreading further).

A surveillance case will be home isolated until results from the test specimen is known.

GPLH relocated from its Mangilao facility to the third floor of the RAN-CARE Building at 761 South Marine Corps Drive, Tamuning, Guam 96913.
