

What You Should Know

Get the Facts about COVID-19

Current Situation in Hawaii

There have been 641 cases of COVID-19 identified in Hawaii. Of those cases, 13% have required hospitalization, and 581 (91%) were residents.

Update: COVID-19 is spreading globally, nationally, and now locally. While the majority of cases identified in Hawaii have been introduced into our state by travelers, especially Hawaii residents, we all need to practice social distancing (i.e., maintaining at least 6 ft distance or 2 arm's length from others) as well as other important infection prevention measures (e.g., wash hands, clean surfaces regularly) to prevent widespread community transmission. Social distancing *can* reduce the spread of disease, prevent our healthcare system from being overburdened, and protect the most vulnerable members in our community from infection. If you get sick, please stay home—get rest and drink plenty of fluids. If you are older or have an underlying medical condition and become ill, call your doctor.

*Positive cases include presumptive and confirmed cases, and Hawaii residents and non-residents; data are preliminary and subject to change. Note that CDC provides case counts according to states of residence.

†Includes cases that meet isolation release criteria (Isolation should be maintained until at least 3 days (72 hours) after resolution of fever and myalgia without the use of antipyretics OR at least 10 days have passed since symptom onset, whichever is longer). (The cases that have died and one case that has left the jurisdiction have been removed from these counts).

‡One case is a Lanai resident whose exposure is on Maui Island and who will be remaining on Maui Island for the interim.
