[888-432-9257](tel:888-432-9257)

The Kentucky Department for Public Health (KDPH) is responding actively to the COVID-19 situation. Our State Health Operations Center is operating at Level 1, its highest activation level. This respiratory disease was first detected in a Kentucky resident on March 6, 2020.

Contact Tracing

A Confidential Public Health Resource

What is Contact Tracing?

Contact Tracing is a process used by the Kentucky Department for Public Health to help stop the spread of diseases like COVID-19.

GOAL: Stop the Spread and Save Lives

Public Health workers reach out to individuals who have contracted COVID-19 to assess their situation and track any recent in-person contacts.

Tracers reach out to identified contacts to provide instructions and connect them to local resources.

By following instructions provided by the Tracer, contacts help stop the spread of COVID-19 and save the lives of Kentuckians.

SAMHSA OTP Guidance: SAMHSA issued guidance allowing states with and without emergency declarations to allow Opioid Treatment Programs (OTPs) to provide 28 days of take-home medication to stable patients and 15 days of medication to less stable patients whom the OTP believes can responsibly manage this amount of medication.

SAMHSA 42 CFR Part 2 Guidance: SAMHSA issued guidance which allows providers to share patient SUD diagnosis information that would normally be protected under 42 CFR Part 2 in instances of a bona fide medical emergency. Usage of the medical emergency exception must be documented by providers.

CMS Guidance to Catastrophic Coverage Plans: CMS issued an FAQ clarifying that catastrophic coverage plans must include coverage of COVID-19 diagnosis and treatment under the Essential Health Benefits. CMS will waive enforcement actions against any such plan which provides COVID-19 services before patients pay the plan's deductible, and encourages plans and states to provide such pre-deductible coverage.
