COVID-19 cases in Massachusetts

COVID-19 cases in Massachusetts as of May 23, 2020

Confirmed cases of COVID-19

COVID-19 case overview data

Updated daily by 4 p.m.

COVID-19 Dashboard - May 23, 2020

The COVID-19 Dashboard includes daily and cumulative confirmed cases; cases by hospital, county, and age/sex/ethnicity; testing by date; deaths; hospital capacity and census; nursing home data; and PPE distribution.

Regarding today's dashboard:

- The number of cases currently in the ICU can now be found on Page 8.
- The % of all cases currently hospitalized number can be calculated by dividing the number currently hospitalized on page 8 by the total number of cases on page 1.

Special note: As of May 18, COVID-19 testing numbers reflect the date a test is administered,

91,662

┿

rather than the date the test result is received. DPH believes this to be a more precise picture of how many people are getting tested each day.

Raw data used to create the dashboard is available here: COVID-19 Raw Data - May 23, 2020

Previous daily charts are available here: Archive of COVID-19 cases in Massachusetts

COVID-19 cases by city/town

Reported weekly. Updated each Wednesday by 4 p.m.
