COVID-19 Daily Dashboard

Updated daily by 4 p.m.

COVID-19 cases in Massachusetts as of June 1, 2020

Confirmed cases of COVID-19

100,805

- [COVID-19 Dashboard - June 1, 2020](#)

PLEASE NOTE: Today, the Department of Public Health will begin reporting both confirmed and probable COVID-19 cases and deaths. This change is in accordance with guidance from the Centers for Disease Control to include “probable” COVID-19 cases and deaths in data collection and reporting efforts.

This change will increase the number of cases and deaths reported in Massachusetts. Today’s newly reported totals are a result of a retrospective review of probable cases and deaths dating back to March 1, 2020.

Also included is data on the total number daily and cumulative COVID-19 antibody tests performed. Antibody tests are blood tests used to determine if a person had COVID-19 in the past and now has antibodies against the virus.

For complete details, please see the "Note to Readers" in the Dashboard document.

The COVID-19 Dashboard includes daily and cumulative data on:

- Confirmed cases
- Testing by date
- Cases by hospital, county, and age/sex/ethnicity
- Hospitalizations
- Deaths
- Hospital capacity and census

Raw data used to create the dashboard is available here: [COVID-19 Raw Data - June 1, 2020](#)
