SCHOOL-RELATED OUTBREAK REPORTING

**Note on deaths (10/17/20):** Regular reviews of death certificate data maintained in Vital Records reporting systems are conducted by MDHHS staff three times per week. As a part of this process, records that identify COVID-19 infection as a contributing factor to death are compared against all laboratory confirmed cases of COVID-19 in the Michigan Disease Surveillance System (MDSS). If a death certificate is matched to a confirmed COVID-19 case and that record in the MDSS does not indicate the individual died, the MDSS record is updated to indicate the death and the appropriate local health department is notified. These matched deaths are then included with mortality information posted to the Michigan Coronavirus website. As a result of the most recent assessment, today's data includes 15 additional deaths identified by :his methodology.

The State of Michigan is working around the clock to test and treat COVID-19 patients. Below is the most recent data nealthcare experts across the state have compiled. It is updated Monday - Saturday.

Ξ

Cases by Hispanic/Latino Ethnicity			
Hispanic/Latino Ethnicity	Percentage of Overall Cases by Ethnicity	Percentage of Deceased Cases by Ethnicity	
Hispanic/Latino	8%	3%	
Non-Hispanic Latino	71%	86%	
Unknown	21%	12%	

Totals may not add to 100% due to rounding
