WHERE WE STAND WITH COVID-19

The State of Michigan is working around the clock to test and treat COVID-19 patients. Below is the most recent data healthcare experts across the state have compiled. It is updated daily.

Total Confirmed Cases

67,683

Total COVID-19 Deaths

6,024

Daily Confirmed Cases

446*

Daily COVID-19 Deaths

9

* Today's daily case count is about 100 cases below the true number of case referrals received since yesterday. This is primarily due to a large number of out-of-state cases being referred to the appropriate states of residence and then removed from Michigan's totals. These cases include out-of-state residents tested in Michigan or incorrect address information. Once a correct address is provided, these cases are shared with the appropriate states. Because of this adjustment, the true number of Michigan resident referrals is more accurately reflected as 446. This does not affect the overall total case number which remains at 67,683. Updated 7/9/2020
