Updated May 13, 2020.

Updated daily at 11 a.m., with data current as of 4 p.m. the previous day.

Data is for cases that were tested and returned positive. All data are preliminary and may change as cases are investigated. Many data points are collected during case interviews. Data presented below are for all cases, regardless of interview status. Data for cases pending interview may be listed as “unknown/missing”.

Not all suspected cases of COVID-19 are tested, so this data is not representative of the total number of people in Minnesota who have or had COVID-19. Cumulative numbers are since Jan. 20, 2020.

Daily Update:

Because all data are preliminary, the change in number of cumulative positive cases and deaths from one day to the next may not equal the newly reported cases or deaths.

5/13/2020

12,917	
Total positive (cumulative)	
431	24

Likely Exposure

[Likely exposure data table](#)

Not all cases among health care workers have a likely exposure as health care staff.

Residence

Cases by County of Residence

County of residence is confirmed during the case interview. At the time of this posting not all interviews have been completed. The county residence

data may not equal the total number of reported positive cases.
