Coronavirus Disease 2019 (COVID-19)

Montana is reporting one case of COVID-19. The patient acquired the illness outside of Montana and has not returned to the state since becoming ill.

2019 Novel Coronavirus (COVID-19)

Get the latest information here and follow
DPHHS Health in the 406 on Facebook, Twitter, and Instagram.

Montana state and local public health officials are monitoring the novel coronavirus disease (COVID-19) situation very closely.

To help prevent the spread of COVID-19 and other respiratory illnesses, you can take simple steps to protect yourself and your family.

- Stay home if you're sick,
- Avoid contact with sick people when possible,
- Cover your cough and sneezes with the crook of your elbow or a tissue
- Avoid touching your eyes, nose and mouth and wash your hands frequently
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe

Call ahead to a healthcare professional if you develop a fever and symptoms of respiratory illness, such as cough or difficulty breathing, and have been in close contact with a person known to have COVID-19 or if you live in or have recently traveled to an area with ongoing spread. Tell your healthcare professional about your recent travel or contact. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19. Find out more at: <https://www.cdc.gov/coronavirus/2019-ncov/about/steps-when-sick.html>

You can contact your [local county or tribal health department](#) for

questions regarding COVID-19, testing or what may be occurring in your community.

Montana DPHHS COVID-19 public health monitoring and testing

Reported COVID-19 Cases in Montana
5*
Individuals monitored by public health
30
- Individuals who have completed monitoring process
26
- Individuals who remain under monitoring
4
Persons tested for COVID-19 by MTPHL**
107
- Persons with negative results
103
- Persons with positive results
4

Information is updated daily by 5 pm, Monday - Friday

***The one case reported to date is a Montana resident with travel-associated illness and no documented exposures or close contacts in Montana. This person was not tested in Montana.**

***Testing numbers include only those tested at the Montana Public Health Laboratory and/or the Centers for Disease Control and Prevention (CDC).*

Persons tested includes:

- those who have symptoms of concern AND may have traveled to an area experiencing community transmission, OR*
- are symptomatic and a close contact to a known or suspected case in the past 14 days, OR*
- are exhibiting symptoms of a compatible illness without other cause after medical examination.*

Patients tested may not have been under monitoring at the time of testing.
