#### Technical Notes

Lab data are reported electronically into the State's electronic laboratory reporting system, NBS (National Electronic Disease Surveillance Based System). Some labs are not reporting all demographic information. The quality and completeness of demographic information will be improved over time.

Daily lab data are updated each morning for the previous day.

Counts may be artificially low Saturday - Monday due to limited weekend reporting.

Death data are updated as deaths are reported, with most updates occurring in the afternoons.

As of 4/8/2020 cumulative daily death counts are displayed by date of death, rather than the date that the death was reported to the state. The total count for statewide deaths on the first tab may not equal the sum of the cumulative daily death counts because of cases where exact date of death is unknown or pending report.

As of 5/9/2020 daily new cases, daily new deaths, growth rates, hospitalizations, and test positivity rates are now available. New cases are attributed to the date they are reported. Deaths are attributed to the date of death, and counts may change retroactively as deaths are reported.

Growth rates represent the amount by which cases/deaths grow over time. The growth rate of COVID-19 may change over time due to actual changes in the growth or for reasons such as implementation of new testing strategies, changes to control measures that are in place, among other reasons. Growth rates are calculated as the difference between the total cumulative number of cases/deaths today from the previous day, divided by the cumulative number of cases/deaths the previous day.

The DHHS Office of Analytics, in conjunction with the Office of Public Health Investigations and Epidemiology and the Bureau of Health Care Quality and Compliance, both within the Division of Public and Behavioral Health, also maintain a facility-specific COVID-19 dashboard, available here: [Facilities Dashboard](#).

# WHAT NEVADANS CAN DO TO HELP

**Nevada Health Response**  
3 hrs · 🌐

**BOULDER CITY** – The City of Boulder City, in partnership with the Southern Nevada Health District (SNHD) and Boulder City Hospital, will provide free COVID-19 nasal swab tests for the community. Emergency Operations staff plan to test 400 residents for COVID-19 virus. The nasal swab tests will be available at a drive-through clinic at Bravo Field Parking Lot on Monday, May 18 and Tuesday, May 19, 2020.

Boulder City Paramedics and Boulder City Hospital Nurses will administe... [See More](#)

Attention Humboldt County residents! The county is providing drive-thru COVID-19 community screenings beginning Thursday, May 14. Testing is open to community residents of all ages.

**HUMBOLDT COUNTY**

# COVID-19

## Drive-Thru Community Screening

**STARTING THURSDAY, MAY 14**

- **Thursday, May 14:** 12 p.m. to 2 p.m. – healthcare, law enforcement, fire and first responders only; 2 p.m. to 10 p.m. - mine, swing shift and nightshift workers.
- **Friday, May 15:** 9 a.m. to 10 a.m. - healthcare, law enforcement, fire and first responders only; 10 a.m. to 5 p.m. - general public.
- **Saturday, May 16:** 9 a.m. to 5 p.m. - general public.
- **Monday, May 18:** 9 a.m. to 5 p.m. - general public.

**FOR RESIDENTS OF ALL AGES**

**INCLUDING . . .** Essential workers, including healthcare workers, first responders, public works, and convenience/grocery store employees; Persons who are in a high-risk category; Employees and residents of congregate settings; Persons who have traveled to an area that is experiencing an outbreak of COVID-19.

**Winnemucca Event Center**  
1000 Fairgrounds Road, Winnemucca

Wear a face covering | Remain in your vehicle at all times  
Only one person per vehicle except in the case of minors, or if driver is needed  
Residents will be notified of positive or negative results after 72 hours

The screening POD is made possible through the joint efforts of the Humboldt County Health Board, Humboldt County Emergency Management, State of Nevada Division of Public and Behavioral Health/Community Health Nursing, the US National Guard, Humboldt County Commission, Humboldt County Sheriff's Office, Winnemucca Police Department and the Humboldt County Health Officer.

**@NVHealthResponse** @NVHealthRespon1 · May 7

Did you know the @NVNationalGuard's COVID-19 response includes sample collection of 1,800 tests in the Quad County region to better understand the level of asymptomatic cases in the state? [#InThisTogether](#)

**DID YOU KNOW?**  
**NEVADA NATIONAL GUARD**

Nevada Guardsmen began collection of asymptomatic cases this week to gather data on how many Nevadans without symptoms have COVID-19.

- 11 mobile collection sites in the Quad-County region
- 1,800 samples are set to be collected and tested
- 5 days will be set for mobile sample collection

# NEVADA HERO OF THE DAY

RECOGNIZING THE HEROES AMONG US, WHO ARE WORKING TIRELESSLY TO HELP THEIR FELLOW NEVADANS.

## NEVADA HERO OF THE DAY Emily Lancione

Emily Lancione, dog care manager at Nevada Humane Society, effectively revised standards and guidelines to remain open in March. She also helped move 52 pets to emergency foster homes — all have since been adopted.

Thank you, Emily, for your support of Washoe County's pets and animals.

**4,399,550**

TOTAL DEATHS

**299,333**

[\\*Johns Hopkins COVID-19 Resource Center](#)

U.S. STATE DEPARTMENT

**LEVEL 4 – DO NOT TRAVEL**

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period.

At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future. U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

**LEVEL 3 – AVOID NONESSENTIAL TRAVEL**

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
