102 Deaths Statewide

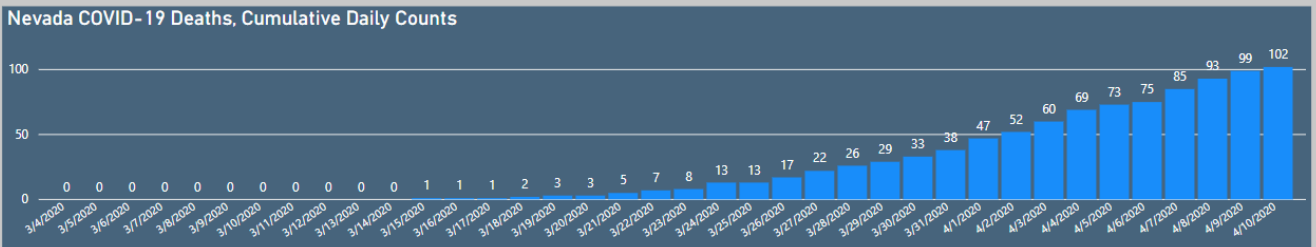

STATEWIDE HOSPITAL CAPABILITY STATUS *

| % Occupied Licensed & Staffed Beds | % ICU Rooms Occupied | % of Ventilators in Use |
|------------------------------------|----------------------|-------------------------|
| 62% | 71% | 42% |

*Nevada Hospital Association Status Updated Daily

COVID-19 CASES IN NEVADA

*As of 4/8/2020 cumulative daily death counts are displayed by date of death, rather than the date that the death was reported to the state. The total count for statewide deaths on the first tab may not equal the sum of the cumulative daily death counts because of cases where exact date of death is unknown or pending report.

STATUS OF FEDERAL REQUESTS

| | |
|--|---|
| <p>Test Kits</p> | <ul style="list-style-type: none"> • HHS is adjudicating distribution of test kits nationwide in accordance with a reasonable burn rate. To date, health districts in Nevada do not have accurate burn rates due to the limited supply. In order to maximize potential fulfillment, Nevada is now requesting up to 5,000 test kits each week. • CDC’s International Reagent Resources (IRR) website is fulfilling reagent requests. • Nevada has received 3,000 reagent kits and 4,000 test swabs from HHS. <p><i>Note: Test kits acquired by community organizations, hospitals, private labs and entities through purchase or donation cannot be tracked by the State of Nevada.</i></p> |
| <p>PPE <i>(Personal Protective Equipment)</i></p> | <ul style="list-style-type: none"> • Nevada received the 3rd and final push of PPE from the Strategic National Stockpile (SNS). • Nevada is distributing federal SNS PPE based upon the Regional Distribution System and population-based proportion. <p><i>Note: The State of Nevada stockpile inventory of PPE has been distributed to the 3 Local Health Authorities (LHAs) and rural counties on a needs-based and population-based proportion based on the 2018 Census Bureau estimates. As new shipments are delivered from federal agencies, they will continue to be distributed throughout the State.</i></p> |
| <p>Other</p> | <ul style="list-style-type: none"> • Nevada received an estimated 150 ventilators from the SNS through FEMA on April 10, 2020. On Wednesday, April 8, Nevada received a loan from Cal OES for 50 California state-owned ventilators for three weeks at no cost. • HHS will direct additional ventilators to the state approximately 72 hours prior to the anticipated need. |

[APRIL 10, 2020] Finalized data from the Nevada Department of Employment, Training and Rehabilitation (DETR) shows initial claims for unemployment insurance totaled 79,285 for regular initial claims for the week ending March 4, up 7,343 claims, or 10.2 percent compared to last week’s total of 71,942. This is the second highest weekly total in state history. Through the week ending April 4, there have been 271,533 initial claims filed in 2020, this is 28,417 more than the state saw in the last two years combined

Continued claims, which represent the current number of insured unemployed workers filing for unemployment insurance benefits, totaled 131,121 during the week. This was an increase of 72,323 claims from a week ago and the most in Nevada history. This week’s total broke the previous all-time high of 84,113 for the week ending May 20, 1989. Continued claims, which lag initial claims, will continue to rise in the coming weeks. Read more [HERE](#).

WHAT NEVADANS CAN DO TO HELP

BATTLE BORN MEDICAL CORPS

DURING THE COVID-19 EMERGENCY, CERTAIN MEDICAL LICENSING REQUIREMENTS ARE WAIVED TO ALLOW NEVADA TO ADD ADDITIONAL HEALTHCARE WORKERS INTO THE SYSTEM

- Respiratory Care Practitioners
- Paramedics
- Pharmacists
- Pharmacy Technicians
- Medical Students
- Nursing Students
- Medical Laboratory Directors or Technicians
- Licensed or Certified Behavioral Health professionals

FACE COVERINGS

As the COVID-19 pandemic continues to impact our health care systems, both nationally and right here in Nevada, it has become increasingly important to slow the spread. In response to this, the State's medical experts have weighed in with information on how to protect ourselves and others with improvised face coverings.

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period.

At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future.

U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
