COVID-19 CASES IN NEVADA

Nevada COVID-19 Cases, Cumulative Daily Counts

Nevada COVID-19 Deaths, Cumulative Daily Counts

*As of 4/8/2020 cumulative daily death counts are displayed by date of death, rather than the date that the death was reported to the state. The total count for statewide deaths on the first tab may not equal the sum of the cumulative daily death counts because of cases where exact date of death is unknown or pending report.

STATUS OF FEDERAL REQUESTS

Test Kits	<ul style="list-style-type: none"> Nevada has received 3,000 reagent kits and 4,000 test swabs from HHS. <i>Note: Test kits acquired by community organizations, hospitals, private labs and entities through purchase or donation cannot be tracked by the State of Nevada.</i>
PPE <i>(Personal Protective Equipment)</i>	<ul style="list-style-type: none"> Nevada received third and final push of PPE from the Strategic National Stockpile (SNS). Nevada distributed the federal SNS PPE based upon a Regional Distribution System to the 3 Local Health Authorities and counties last week. As additional PPE is acquired from federal agencies, donations and DEM purchases, it will continue to be distributed to the local health authorities and counties. <i>Note: The State of Nevada stockpile inventory of PPE has been distributed to the 3 Local Health Authorities (LHAs) and rural counties on a needs-based and population-based proportion based on the 2018 Census Bureau estimates.</i>
Other	<ul style="list-style-type: none"> Nevada received 150 ventilators from the SNS through FEMA on April 10, 2020. On Wednesday, April 8, Nevada received a loan from Cal OES for 50 California state-owned ventilators for three weeks at no cost. HHS will direct additional ventilators to the state approximately 72 hours prior to the anticipated need.

STATE OF NEVADA COVID-19 UPDATES

[APRIL 14, 2020] Nevada Governor Steve Sisolak instructed DETR to backdate all Unemployment Insurance Claims to the earliest date of eligibility, since many have struggled to login due to the unprecedented volume. He also announced that Nevada expects to be among the early states that will be dispersing the additional \$600 from the CARES Act to those who qualify for it. Read more [HERE](#).

[APRIL 15, 2020] DETR announced that Alorica, their new call center vendor, will begin assisting claimants with general questions related to the unemployment insurance filing process. The Department also rolled out a new recommended method for online filing, organized by **LAST** name: **A-K on Sundays, L-R on Mondays, S-Z on Tuesdays.** Wednesday through Saturday would be open for new claim initiation and renewals for those that didn't previously file on their recommended date. To reach the call center, toll-free, dial: 1(800) 603-9671 or click here find out more [HERE](#).

[APRIL 15, 2020] Governor Sisolak signed [Directive 014](#) supporting districts and their schools to provide distance learning for their students. Additionally, it gives school superintendent Ebert the authority to waive or suspend certain laws that would prevent students from graduating on time. Find out the specifics [HERE](#).

[APRIL 15, 2020] The Nevada Division of Public and Behavioral Health issued a cease and desist order to an unlicensed lab in Las Vegas – Sahara West Urgent Care & Wellness. The test this unlicensed lab was using would not prove a definitive result for diagnosing COVID-19, prompting DPBH to require the center to immediately notify all patients that the results they received were not valid for a definitive diagnosis. The investigation is underway. To read more, click [HERE](#). If you want to file a complaint against a facility, go [HERE](#). For NV Health Response Consumer information, go [HERE](#). WHAT NEVADANS CAN DO TO HELP

BATTLE BORN MEDICAL CORPS

DURING THE COVID-19 EMERGENCY, CERTAIN MEDICAL LICENSING REQUIREMENTS ARE WAIVED TO ALLOW NEVADA TO ADD ADDITIONAL HEALTHCARE WORKERS INTO THE SYSTEM

[Sign up at ServNV.org](http://ServNV.org)

The waiver allows medical professionals who are trained and in a medical field, but are not currently licensed in Nevada are being asked to seek a waiver and sign up.

- Medical Doctors
- Physician Assistants
- Nurse Practitioners
- Advance Practice Registered Nurses
- Registered Nurses
- Licensed Practical Nurses
- Emergency Medical Technicians
- Advanced Emergency Medical Technicians
- Respiratory Care Practitioners
- Paramedics
- Pharmacists
- Pharmacy Technicians
- Medical Students
- Nursing Students
- Medical Laboratory Directors or Technicians
- Licensed or Certified Behavioral Health professionals

FACE COVERINGS HELP PREVENT SPREAD

While there is no consensus if masks can reduce individuals' risk for contracting COVID-19, it is well established that even improvised homemade face coverings can control and reduce the spread of the virus from infected individuals.

Since transmissions may occur prior to the development of symptoms, face coverings can serve as a source of control for an individual who may be infected, but there are no substitutes for handwashing and aggressive social distancing. For more information, visit NVHealthResponse.nv.gov.

FACE COVERINGS

As the COVID-19 pandemic continues to impact our health care systems, both nationally and right here in Nevada, it has become increasingly important to slow the spread. In response to this, the State's medical experts have weighed in with information on how to protect ourselves and others with improvised face coverings.

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period.

At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future.

U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
