

Nevada Health Response

COVID-19 PANDEMIC

Daily Situation Report

April 21, 2020

CLEARED FOR PUBLIC DISTRIBUTION

**NEVADA
HEALTH
RESPONSE**

In coordination with the Office of Governor Steve Sisolak

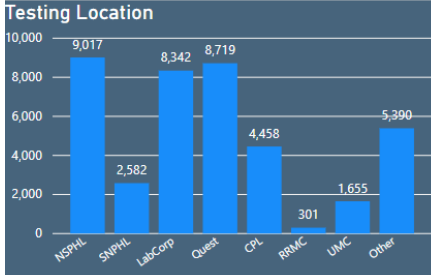

COVID-19 NEVADA STATISTICAL DATA April 21, 2020

* CLEARED FOR PUBLIC DISTRIBUTION *

COVID-19 BY THE NUMBERS - NEVADA

40,464 Tests Performed
33,055 People Tested

Note: a single individual may receive multiple tests.

3,937 Positive
29,118 Negative
163 Deaths Statewide

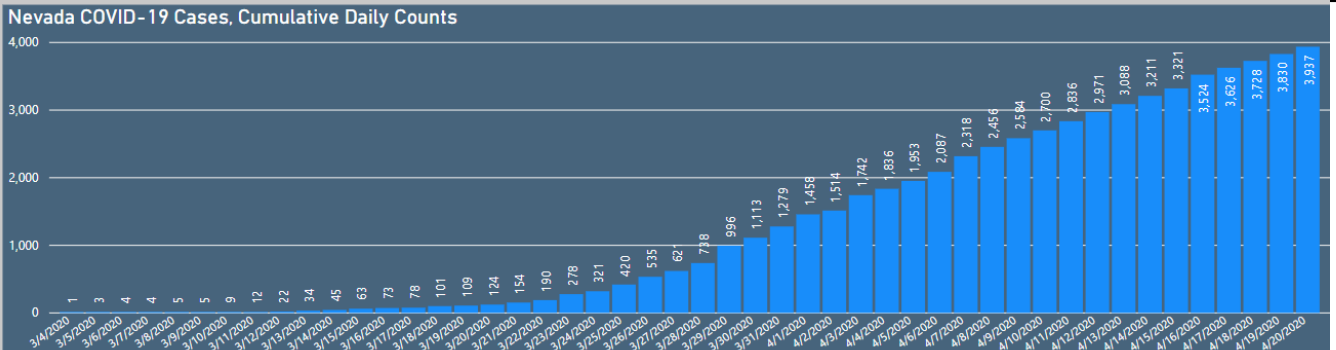

STATEWIDE HOSPITAL CAPABILITY STATUS *

% Occupied Licensed & Staffed Beds	% ICU Rooms Occupied	% of Ventilators in Use
63%	71%	34%

*Nevada Hospital Association Status Updated Daily

COVID-19 CASES IN NEVADA

*As of 4/8/2020 cumulative daily death counts are displayed by date of death, rather than the date that the death was reported to the state. The total count for statewide deaths on the first tab may not equal the sum of the cumulative daily death counts because of cases where exact date of death is unknown or pending report.

STATE OF NEVADA COVID-19 UPDATES

[APRIL 21, 2020]

Nevada Gov. Steve Sisolak was joined by Nevada experts to announce the framework the State will use as it begins to roll back restrictions and re-open. Gov. Sisolak was joined by a team of Nevada experts to lay out the State's criteria and provide updates specific to Nevada, which can be seen in the graphic to the right.

ADDITIONAL NEVADA COVID-19 UPDATES

[APRIL 21, 2020] Nevada's Certified Community Behavioral Health Centers (CCBHC's) announced that they are offering crisis services and telehealth during this pandemic. The CCBHC's focus on person-centered and family-centered outpatient and behavioral health services as well as primary care treatment for the entire family. Per their message, nobody will be turned away for inability to pay, and the staff will help in any way that they can, including assisting individuals with Medicaid enrollment. Click [HERE](#) to read the release or go [HERE](#) for more information about CCBHC's.

[APRIL 21, 2020] Nevada Attorney General Aaron Ford, along with 21 other states, sent a letter to the Department of Agriculture (USDA) urging the Trump Administration not to finalize a proposed rule that would take Supplemental Nutrition Assistance Program (SNAP) benefits from low-income Americans. In the letter, AG Ford and the other states describe how this rule would not only take away food assistance from those in need but also impair the national response to the pandemic while imposing major administrative burdens on States that are desperately fighting COVID-19. The AG's press releases can be found on their [WEBSITE](#).

[APRIL 21, 2020] The Nevada Department of Corrections (NDOC) announced today that they would be providing distance learning to inmates. Since COVID-19 necessitated that NDOC modify their learning operations, Nevada educators worked to help them facilitate learning in creative ways, like offering real-time video lectures, delivering course materials directly to the facilities, and expanding the use of email. For more information about NDOC's education services, you can click [HERE](#).

WHAT NEVADANS CAN DO TO HELP

BATTLE BORN MEDICAL CORPS

DURING THE COVID-19 EMERGENCY, CERTAIN MEDICAL LICENSING REQUIREMENTS ARE WAIVED TO ALLOW NEVADA TO ADD ADDITIONAL HEALTHCARE WORKERS INTO THE SYSTEM

[Sign up at ServNV.org](http://ServNV.org)

The waiver allows medical professionals who are trained and in a medical field, but are not currently licensed in Nevada are being asked to seek a waiver and sign up.

- Medical Doctors
- Physician Assistants
- Nurse Practitioners
- Advance Practice Registered Nurses
- Registered Nurses
- Licensed Practical Nurses
- Emergency Medical Technicians
- Advanced Emergency Medical Technicians
- Respiratory Care Practitioners
- Paramedics
- Pharmacists
- Pharmacy Technicians
- Medical Students
- Nursing Students
- Medical Laboratory Directors or Technicians
- Licensed or Certified Behavioral Health professionals

FACE COVERINGS HELP PREVENT SPREAD

While there is no consensus if masks can reduce individuals' risk for contracting COVID-19, it is well established that even improvised homemade face coverings can control and reduce the spread of the virus from infected individuals.

Since transmissions may occur prior to the development of symptoms, face coverings can serve as a source of control for an individual who may be infected, but there are no substitutes for handwashing and aggressive social distancing. For more information, visit NVHealthResponse.nv.gov.

FACE COVERINGS

As the COVID-19 pandemic continues to impact our health care systems, both nationally and right here in Nevada, it has become increasingly important to slow the spread. In response to this, the State's medical experts have weighed in with information on how to protect ourselves and others with improvised face coverings.

THANKS FOR
HELPING US

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period. At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future. U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
