

Coronavirus COVID-19 (Formerly known as 2019-nCoV)

Nevada's Response to the 2019 Novel Coronavirus

The Centers for Disease Control and Prevention (CDC) and the Nevada Department of Health and Human Services, Division of Public and Behavioral Health (DPBH) are closely monitoring the outbreak of respiratory illness caused by the 2019 novel coronavirus (COVID-19), first identified in Wuhan, Hubei Province, China.

Thousands of cases have been confirmed in China with additional cases identified in other international locations and the United States.

Nevada does not have any confirmed cases of COVID-19 and the data provided below will be updated weekly. All data are provisional and subject to change as we continue our investigation.

Test Results for Persons Under Investigation (PUI)*	
Last updated 3/3/2020, 5:40 PM	
Positive	0
Negative**	14
*According to the latest CDC guidelines, PUI are individuals with COVID-19 symptoms—but not necessarily the virus—who may have been exposed through close contact with a confirmed case, travel to an affected region (e.g., China, Iran, Italy, Japan, or South Korea), or who have severe respiratory illness requiring hospitalization with no more likely diagnosis and no source of exposure has been identified. **Persons who have tested negative for COVID-19 and for whom no further follow up is needed.	
Individuals under Public Health Supervision (PUM)*	
Last updated 3/3/2020, 5:40 PM	
Current	208
PUM who have completed monitoring without developing symptoms or were determined to have no risk	216
*Individuals under Public Health Supervision (also known as persons under monitoring or “PUM”) include travelers from an affected region referred to local health districts for monitoring or individuals who may have had close contact with a traveler. Sources include the CDC’s Division of Global Migration and Quarantine and travelers who have voluntarily contacted local health districts upon arrival in Nevada. These individuals are <u>not</u> exhibiting symptoms consistent with COVID-19.
