COVID-19 Testing Reported to New Jersey Department of Health
As of 1:00pm ET, June 3

[New Jersey COVID-19 Information Hub](#)

Positive†	162068
Deaths	11880
Total tests	837420

- [Confirmed Case Summary](#)
- [Mortality Data Trends](#)
- [Department of Health COVID-19 home page >](#)

† Includes deaths and results reported by state, commercial and medical center laboratories

* The total number of tests that have been reported to the New Jersey Department of Health using PCR, the most widely used viral testing method. It is not a count of how many people have been tested. Some persons have been tested multiple times, while some tests produce inconclusive results and need to be repeated. Additionally, about 20 percent of the tests performed on New Jersey residents, particularly persons who were tested at private facilities, have been processed by laboratories that are not known to consistently report negative results.
