† Includes deaths and results reported by state, commercial and medical center laboratories

* The total number of tests that have been reported to the New Jersey Department of Health using PCR, the most widely used viral testing method. It is not a count of how many people have been tested. Some persons have been tested multiple times, while some tests produce inconclusive results and need to be repeated. Additionally, about 20 percent of the tests performed on New Jersey residents, particularly persons who were tested at private facilities, have been processed by laboratories that are not known to consistently report negative results.

In The News

Outdoor Visitation with Long-Term Care Residents Can Begin Sunday, June 21

Residents of long-term care facilities will be able to have outdoor visits with loved ones in designated outdoor space starting Sunday, June 21—Father's Day-- under a directive to long-term care facilities issued by the Department of Health.
