

# COVID-19 North Carolina Dashboard

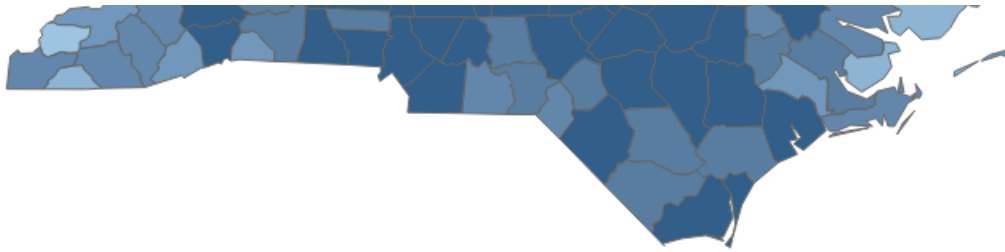

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.

On Aug. 12, 2020, NCDHHS [announced](#) corrections to the state's daily and cumulative completed COVID-19 test counts after discovering a discrepancy in testing data that had been submitted by LabCorp.

Hospitalization data from a large health system were not received by the deadline for today's report, so hospitalization numbers will look artificially low for both the state and the Mountain Area Healthcare Preparedness Coalition (MAHPC) region.

Updated daily by approximately 12:00 p.m. Last updated August 16, 2020 at 12:20 p.m.
