

COVID-19 North Carolina Dashboard

Since Friday, September 4, the North Carolina Department of Health and Human Services has experienced continued technical and submissions issues with hospital systems data, which have been exacerbated by the holiday weekend, resulting in incomplete hospitalization data. NCDHHS is working with all parties to resolve these issues. Because the COVID-19 NC Dashboard displays only data that it is received, it is likely that actual hospital numbers are higher than what is on the current dashboard.

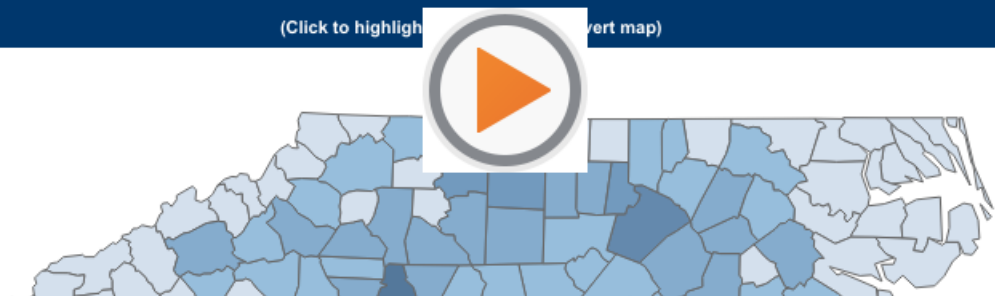

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.
