

## COVID-19 North Carolina Dashboard

From Friday, September 4 through Monday, September 7, the North Carolina Department of Health and Human Services experienced continued technical and submissions issues with hospital systems data, which were exacerbated by the holiday weekend, resulting in incomplete hospitalization data. Because the COVID-19 NC Dashboard displays only data that it is received, it is likely that actual hospital numbers for September 4-7 are higher than what is on the current dashboard. NCDHHS has worked with all parties to resolve these issues and will post revised numbers for those dates once correct data is received and confirmed.

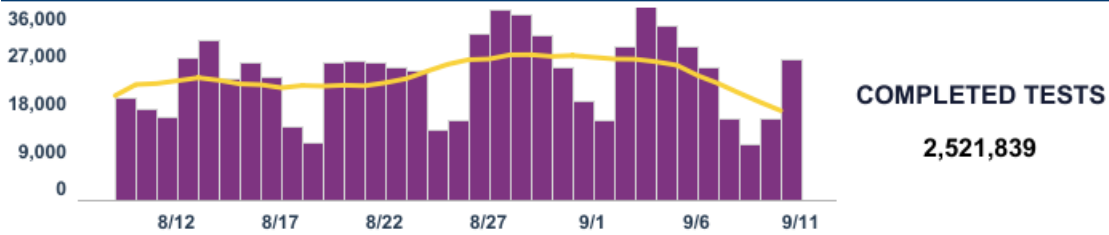

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.
