

COVID-19 North Carolina Dashboard

On October 4, NCDHHS experienced technical issues which prevented some laboratory data files from being processed in the NC COVID reporting system. As a result, cases and test data are lower for October 4 than they would have been had all data been processed. Data reported on October 5 will be higher as it will incorporate cases that were intended to be submitted on October 4. NCDHHS is working to resolve the issue.

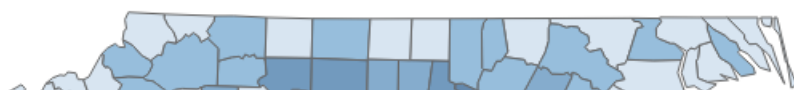

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.

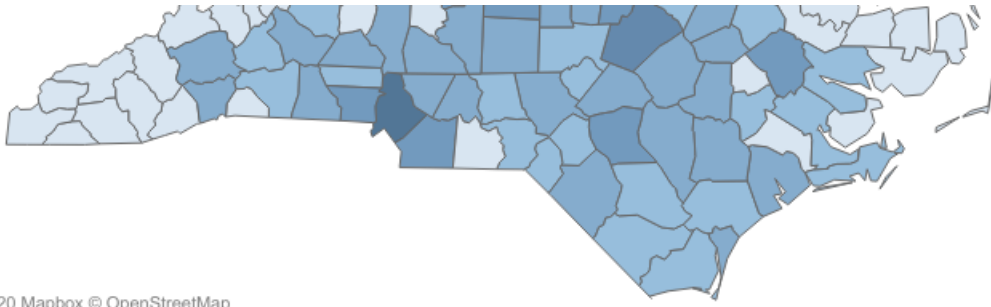

Updated daily by approximately 12:00 p.m. Last updated October 4, 2020 at 12:00 p.m.
