Coronavirus Cases

The North Dakota Department of Health dashboard displays the most recent preliminary data about cases, long term care, testing, and deaths. The investigations are ongoing and the information on the website may change due to newly acquired information.

Updated around 11:00 AM daily

Last updated: 5/13/2020 at 11:00 AM

Positive Cases: Number of individuals who test positive for COVID-19 from state and private labs.

Negative Cases: Number of individuals who test negative for COVID-19 from state and private labs.

Total Tested: Number of people tested for COVID-19 infection at state and private labs.

Recovered: Number of cases who tested positive and have since been released from isolation and are no longer contagious.

Currently Hospitalized: Number of individuals currently hospitalized. These numbers are updated as they're reported to us through the Health Information Network and hospital reporting. There may be delays in reporting.

Total Hospitalized: Total number of positive cases who are currently or were hospitalized, including individuals who have passed away.

Deaths: Number of individuals who died from any cause while infected with COVID-19.

Source of Exposure

Cases by Gender

Deaths

Cause
Deaths Due to COVID-19 <i>Official number of individuals who died from COVID-19 as stated on the official death record. There will be a difference between this number and the total number of deaths due to COVID-19.</i>
Deaths Where COVID-19 is Not the Primary Cause <i>Deaths that list something other than COVID-19 as the official cause of death.</i>
Pending Death Records <i>The number of deaths where an official death record has not been filed. Per state law, this can take up to 14 days to be filed.</i>

Cases by Age Group

Hospitalized by age group

People who have been hospitalized with COVID-19 by age.

Total Positive Cases by County

(5/13/2020 update coming see same data below in the other formats)
