Coronavirus Cases

The North Dakota Department of Health dashboard is updated daily by 11 a.m. and includes cases reported through the previous day. The investigations are ongoing and information on the website is likely to change as cases are investigated. The information on the dashboard is the most accurate available and may be different than previous news releases.

Last updated: 5/16/2020 at 11:00 AM

Positive Cases: Number of unique individuals who test positive for COVID-19 from state and

private labs.

Negative Cases: Number of unique individuals who test negative for COVID-19 from state and private labs.

Total Tested: Number of unique people tested for COVID-19 infection at state and private labs.

Recovered: Number of cases who tested positive and have since been released from isolation and are no longer contagious.

Currently Hospitalized: Number of individuals currently hospitalized. These numbers are updated as they're reported to us through the Health Information Network and hospital reporting. There may be delays in reporting.

Total Hospitalized: Total number of positive cases who are currently or were hospitalized, including individuals who have passed away.

Deaths: Number of individuals who died from any cause while infected with COVID-19.

63,353 - Total Number of Tests Completed: This includes tests reported from all labs and does not include individuals from out of state.
