Coronavirus Cases

The North Dakota Department of Health dashboard is updated daily by 11 a.m. and includes cases reported through the previous day. The investigations are ongoing and information on the website is likely to change as cases are investigated. The information on the dashboard is the most accurate available and may be different than previous news releases.

Serology Testing

Reported serology tests are completed in a laboratory and do not include point of care serology tests.

Individuals who complete an antibody and a PCR test maybe be counted in totals for both.

Cases by Gender

Deaths

Cause	Cases
Deaths Due to COVID-19 <i>Official number of individuals who died from COVID-19 as stated on the official death record. There will be a delay - by state law, a death record must be filed within 10 days of the date of death.</i>	62
Deaths Where COVID-19 is Not the Primary Cause <i>Deaths that list something other than COVID-19 as the official cause of death.</i>	8
Pending Death Records <i>The number of deaths where an official death record has not been filed. Per state law, this can take up to 10 days from the date of death.</i>	2
Total number of individuals who tested positive and died from any cause while infected with COVID-19.	72
Deaths of Individuals Presumed Positive Deaths of individuals where COVID-19 was listed as the cause of death on the official death record, but there was not a positive test result. These individuals are presumed positive by the health care provider based on symptoms and/or exposure.	3

Cases by Age Group

Hospitalized by age group

People who have been hospitalized with COVID-19 by age.
