Coronavirus Cases

The North Dakota Department of Health dashboard is updated daily and includes cases reported through the previous day. The investigations are ongoing and information on the website is likely to change as cases are investigated. The information on the dashboard is the most accurate available and may be different than previous news releases.

Recovered

Last updated: 7/24/2020

Positive Cases: Number of unique individuals who test positive for COVID-19 from state and private labs.

Negative Cases: Number of unique individuals who test negative for COVID-19 from state and private labs.

Unique Individuals Tested: Number of unique people tested for COVID-19 infection at state and private labs.

Recovered: Number of cases who tested positive and have since been released from isolation and are no longer contagious.

Currently Hospitalized: Number of individuals currently hospitalized. These numbers are updated as they're reported to us through the Health Information Network and hospital reporting. There may be delays in reporting.

Total Hospitalized: Total number of positive cases who are currently or were hospitalized, including individuals who have passed away.

Deaths: Number of individuals who tested positive and died from any cause while infected with COVID-19.

279,909 - Total Number of Tests Completed: This includes tests reported from all labs and does not include individuals from out of state.

Serology Testing

Reported serology tests are completed in a laboratory and do not include point of care serology tests. Individuals who complete an antibody and a PCR test maybe be counted in totals for both.
