## NOVEL CORONAVIRUS (COVID-19) UPDATES AND INFORMATION

[COVID-19 in South Dakota](#) | [News](#) | [Precautions to Avoid Illness](#) | [What To Do If You Develop Symptoms](#) | [Community Guidance & Resources](#) | [Information for Medical Providers](#) | [SD Guidance for Healthcare Providers](#) | [CDC Guidance for Healthcare Providers](#) | [CDC Website](#)

The South Dakota Department of Health (SD-DOH) continues to respond to the emergence of the novel coronavirus. We are working with the CDC and our healthcare partners across the state to protect South Dakotans from COVID-19.

**Updates include:**

- Cases have been identified in South Dakota.
- The number of cases and countries with infections worldwide is increasing and can be found on the [WHO website](#).
- Case counts and other information about the novel coronavirus can be found on the [CDC website](#).
- Travelers returning from High Risk Countries ( [See CDC Travel Advisories](#)) should self-monitor for 14 days for novel coronavirus symptoms (e.g., fever, cough, or shortness of breath) and call their medical provider to discuss their symptoms.

### COVID-19 IN SOUTH DAKOTA

On March 4, 2020, CDC updated the clinical criteria for testing a symptomatic individual after evaluation by their healthcare provider. As a result, the South Dakota Department of Health (SD-DOH) expects the number of persons under investigation (PUI) being tested for COVID-19 to increase.

**The number of PUI being tested does not reflect the level of risk to the public in the state.** For more information about the outbreak, potential risks, and protective recommendations, visit the [SD-DOH website](#) or [CDC website](#).

This table shows the total number of positive COVID-19 cases in South Dakota residents, the total number of persons that tested negative, and

the total number of PUIs that are pending results.

**As of March 14, 2020**

<b>Positive*</b>	9
<b>Negative</b>	182
<b>Pending</b>	3

\*Includes presumptive positives sent to CDC for final testing

**2019 Novel Coronavirus (COVID-19) in South Dakota**

<b>Number of Cases</b>	9
------------------------	---

**South Dakota Counties with COVID-19 Cases**

<b>Beadle</b>	1
<b>Bon Homme</b>	1
<b>Charles Mix</b>	1
<b>Davison</b>	1
<b>McCook</b>	1
<b>Minnehaha</b>	3
<b>Pennington</b>	1

Note: All cases had travel history outside South Dakota prior to illness onset. There is no community transmission at this time.

**Age Group of South Dakota COVID-19 Cases**

<b>0 to 19 years</b>	0
<b>20 to 29 years</b>	0
<b>30 to 39 years</b>	2
<b>40 to 49 years</b>	3
<b>50 to 59 years</b>	2
<b>60 to 69 years</b>	2
<b>70 to 79 years</b>	0
<b>80+ years</b>	0

**Sex of South Dakota COVID-19 Cases**

<b>Male</b>	8
<b>Female</b>	1

These tables will be updated every day

**PRECAUTIONS TO AVOID ILLNESS**

**What can you do?**

- Wash your hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer.
- Cover your coughs and sneezes with a tissue.
- Avoid close contact with people who are sick.
- Refraining from touching your eyes, nose and mouth.
- Clean frequently touched surfaces and objects.
- Individuals at higher risk for severe COVID-19 illness, such as older adults and people who have chronic medical conditions like heart, lung or kidney disease, should [take actions](#) to reduce your risk of exposure.
- Create a family [plan](#) to prepare for COVID-19 and develop a [stay at home kit](#) with food, water, medication, and other necessary items.

[Environmental Cleaning and Disinfection Recommendations](#) (CDC)

South Dakota's healthcare system is prepared to identify and treat cases of COVID-19.

**WHAT TO DO IF YOU DEVELOP SYMPTOMS**

**If you develop symptoms:**

- Call your health care provider immediately and tell them about any recent travel or exposure.
- Individuals who are concerned that they have COVID-19 should contact their healthcare provider via phone before going to a clinic or hospital to prevent spread in healthcare facilities.
- Avoid contact with other people.
- Follow the directions of your provider and public health officials.

### Find Federally Qualified Health Centers in South Dakota

CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory illnesses, including COVID-19. You should only wear a mask if a healthcare professional recommends it. A facemask should be used by people who have COVID-19 and are showing symptoms. This is to protect others from the risk of getting infected. The use of facemasks also is crucial for **health workers** and other **people who are taking care of someone infected with COVID-19 in close settings** (at home or in a health care facility).

## COMMUNITY GUIDANCE & RESOURCES

### Community mitigation guidance from the CDC is available for:

- Households
- People at Higher risk
- Businesses
- Schools and childcare centers
- Colleges and Universities
- Community and faith-based organizations
- Large events
- Law enforcement

## INFORMATION FOR MEDICAL PROVIDERS

- Medical providers who are concerned a patient may be infected with COVID-19 should:
  - Mask the patient
  - Isolate the Patient in a private room or separate area, and
  - Contact with SD-DOH (800-592-1861) immediately for consultation and guidance
- Clinicians are strongly encouraged to test for other infectious causes of respiratory illness, such as influenza and RSV. **Note:** Asymptomatic patients are **not eligible** for testing at the SD Public Health Laboratory.

Priority Level	Clinical Features	Risk Exposure*
Low	Fever OR Cough OR Shortness of Breath	None identified
Medium	Fever OR Cough OR Shortness of breath AND Elevated risk for severe infection**	None identified
Medium	Fever OR Cough OR Shortness of Breath	Identified risk
High	Fever OR Cough OR Sore Throat OR Shortness of Breath	Identified healthcare risk***
High	Fever AND Cough OR Shortness of Breath	Identified risk

\*Individual meets the risk exposure criterion if they have one of the following:

- Close contact to a laboratory-confirmed case within 14 days of symptom onset.
- History of travel to a geographic area with community transmission in a state within 14 days of symptom onset. [Visit CDC website for the current list of states.](#)
- History of travel from a country under a Level 2 or Level 3 Travel Advisory. [Visit CDC website for the current list of countries.](#)

\*\*Elevated Risk for Severe COVID-19 Infection:

- Hospitalized patients
- Older adults (65 years of age and older)
- Individuals with certain pre-existing conditions (e.g., heart disease, lung disease, diabetes, and immunosuppressed)

\*\*\*Any healthcare worker who was caring for or who had unprotected direct contact with infectious secretions or excretions of a suspected COVID-19 patient or laboratory-confirmed case within 14 days of symptoms onset.

## SD GUIDANCE FOR HEALTHCARE PROVIDERS

- Guidance on specimen collection and testing, infection control practices, and other considerations are available at:

- SD-HAN 20-007: [Guidance on Evaluating Persons for COVID-19 Infection](#) (Updates SD-HAN 20-003)
