 *Please note regarding case counts:* This data changes rapidly as labs conduct tests and identify new cases. Labs assign those cases

to a county or leave that information blank. Metro and regional health departments then determine the appropriate county of jurisdiction during their public health investigation. We're working to reduce the "pending" number to 0. Contact the local health department for county specific information. Cases among Tennessee residents are counted by their county of residence. Residents of other states who were tested at Tennessee healthcare facilities are counted as "Out of TN".

** Data include both confirmed and presumptive positive cases of COVID-19 reported to TDH or tested by TDH since January 21, 2020. These figures are updated daily at 2 p.m. Central time and reflect all cases reported to TDH as of that time.*
