Date when people tested positive for COVID-19 in Utah

Number of people who have been tested for COVID-19 in Utah (this includes public and some private labs)

***Laboratory Data Note:**

As of March 19th, 2020 all major private and public laboratories in Utah are reporting positive and negative COVID-19 (SARS-CoV-2) results to UDOH and positive cases are being reported immediately. However, results may have up to a 72 hour lag before being reported and results prior to March 19th may be under reported. Laboratory results are presented by the date a sample was tested. Laboratory positives may not match confirmed cases due to ongoing investigations and confirmatory testing.
