How likely am I to get COVID-19?

You are more likely to get sick if you are near an infected person for long periods of time. For example, if the sick person:

Lives with you.

Works closely with you.

Carpools with you.

Is near you in a healthcare facility.

Hangs out with you.

Is in your class.

Who's more likely to get seriously ill?

Adults aged 60 and older.

People with weakened immune systems from medical conditions or their treatment.

Help prevent the spread of germs if someone near you is sick.

Prevent the spread of COVID-19 in Pierce County

Follow basic steps to prevent the spread of COVID-19:

- Wash your hands with hot water and soap for at least 20 seconds.
- Avoid touching your face, mouth and eyes.
- Stay home if you have a fever or cough or experience shortness of breath.
- Cover sneezes and coughs with your elbow.
- Disinfect frequently used surfaces such as tabletops, doorknobs, bathroom fixtures, mobile devices and keyboards.
- Avoid sharing personal items like water bottles, eating utensils or towels.
- Avoid large social gatherings and crowds.
