COVID-19 CASE COUNT INFO

CASE INFORMATION FOR SNOHOMISH COUNTY RESIDENTS

The Snohomish Health District is now providing regular updates on case counts in Snohomish County.

Our update on case counts is issued at approximately 2 p.m. Monday through Friday. As of March 22, 2020, we will not have our daily 2 p.m. updates on weekends. We will continue daily updates at 2 p.m. on weekdays. Cases reported over the weekend will be reflected in Monday's update.

Please be aware, as more testing has become available, we are getting increased numbers of reports from laboratories and other facilities. It takes time to reconcile data in order to report numbers accurately. Each table is labeled with when it was last updated on this page.

In addition, we report case numbers, including numbers of deaths, each day that are official through 11:59 p.m. the night before. People may hear directly from health care facilities that provide different numbers of deaths than our official count, and may be providing it before we have the information and a chance to reconcile the data.

Due to the increased numbers of cases and more data flowing into the Snohomish Health District that needs to be analyzed, we are no longer able to provide specific information about all cases as we did earlier in this outbreak.

We are committed to providing accurate information while respecting the medical privacy of those who become ill with COVID-19.

Case Count:	Confirmed
Last Updated: 11:15 a.m. 3/23/2020:	519
Case Count:	Probable
Last Updated: 11:15 a.m. 3/23/2020:	28

Confirmed: *positive test result.* ***Probable:*** *symptomatic close contact associated with a confirmed case. As of March 13, the Snohomish Health District is no longer reporting suspect, pending or ruled out case numbers. As more commercial labs begin providing COVID-19 testing, the District no longer receives reports of all residents who are tested and awaiting results or who have tested negative.*
