What is novel coronavirus?
 Novel coronavirus (2019-nCoV) is a virus strain that has only spread in people since December 2019. Health experts are still learning about this new virus and it has the potential to cause severe illness and pneumonia in some people.

How does novel coronavirus spread?
 Health experts are still learning the details about how this new coronavirus spreads. Other coronaviruses spread from an infected person to others through:

- The air by coughing and sneezing.
- Close personal contact, such as touching or shaking hands.
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes.
- In rare cases, contact with feces (poop).

How severe is novel coronavirus?
 Experts are still learning about the range of illness from novel coronavirus. Reported cases have ranged from mild illness (similar to a common cold) to severe pneumonia that requires hospitalization. So far, deaths have been reported mainly in older adults who had other health conditions.

What are the symptoms?
 People who have been diagnosed with novel coronavirus have reported symptoms that may appear in as few as 2 days or as long as 14 days after they are exposed to the virus:

 **Fever**
  **Cough**
  **Difficulty breathing**

○ Russian
Concerns about COVID-19?
 Do these things to prevent any kind of respiratory illness

Wash your hands often.

Cover your coughs & sneezes.

Call ahead before visiting your doctor.

Stay home when sick.
 If you have severe symptoms that need medical attention, call the clinic before going in.

Clean all "high-touch" surfaces daily.

If you are sick:

- If you have symptoms like cough, fever, or other respiratory problems, contact your regular doctor first. Do not go to the emergency room. Emergency rooms need to be able to serve those with the most critical needs.
- If you have traveled, make sure to tell your doctor about it.
- Healthcare providers are working with local public health departments and CDC to determine who needs to be tested for COVID-19.

For more information:
 The Washington State Department of Health has established a call center to address questions from the public. If you have questions about what is happening in Washington, how the virus is spread, and what to do if you have symptoms, please call 1-800-525-0127 and press 8.

Compassion keeps our community strong.

Have compassion for others.

- Viruses don't discriminate based on race, ethnicity, or cultural background. This kind of stigma makes any situation worse, not better!
- Everyone reacts differently to stressful situations. Practice compassion towards others who may have a different experience.

Compassion keeps our community Strong

Have compassion for people who are sick or social distancing.

- Reach out virtually to someone you care about who is at home sick or in self-quarantine.
- If you see someone in public coughing or sneezing, be kind. Offer a tissue, or kindly suggest they cough into their elbow.

Have compassion for yourself.

- Make time to unwind and remind yourself that strong feelings will fade.
- Take breaks from watching, reading, or listening to news stories.
- Ask for help if you feel overwhelmed or concerned that COVID-19 is affecting your ability to function. It's ok to reach out to your primary care provider, a counselor, or faith leader for support.

PRECAUCIONES PARA EL CORONAVIRUS (COVID-19)

 Si tiene fiebre de más de 100.4F, tos o falta de aire, no trabaje. Dígale a su supervisor, váyase a su casa y llámelo a un médico.

 Use una cubierta sobre su boca y nariz cada vez que no esté en casa. Puede usar un pañuelo o una mascarilla de tela.

[English](#) Lávese las manos con frecuencia con agua y jabón. Si no puede lavarse las manos, use un desinfectante para manos con más de 60% de alcohol.
 [Spanish](#)

 Manténgase a 6 pies de distancia de las personas que lo rodean cuando trabaja, come y sale al público.

 Solo salga de casa para ir a trabajar u obtener los artículos necesarios, como comestibles o visitar a un médico.

 No se reúnan en grupos grandes.

Stay Home, Stay Healthy

- [English](#)

Stay Home, Stay Healthy, Save Lives

Whatcom County HEALTH Department

What does Stay Home, Stay Healthy mean?
You must stay home except for supplies and services like:

- Food and household supplies.
- Medicine or medical care.
- Travel to work for essential jobs.

What can I still do?
It's ok to hang out with the people you live with.

Go outside and exercise!

What are essential jobs?
Stay Home, Stay Healthy applies to all people except those performing essential jobs like:

- First responders
- Healthcare workers
- Public works
- Order delivery or takeout

Keep 6 feet between you and people who don't live with you.

Why should I stay home?
Staying home is the best way to protect yourself, your family and your community's health.

Keep healthcare facilities open to those who need them.

Protect people with higher risk of severe illness.

31 non-emergency appointments.
