 ○ Punjabi

**What is novel coronavirus?**  
 Novel coronavirus (2019-nCoV) is a virus strain that has only spread in people since December 2019. Health experts are still learning about this new virus and it has the potential to cause severe illness and pneumonia in some people.

**How does novel coronavirus spread?**  
 Health experts are still learning the details about how this new coronavirus spreads. Other coronaviruses spread from an infected person to others through:

- The air by coughing and sneezing.
- Close personal contact, such as touching or shaking hands.
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes.
- In rare cases, contact with feces (poop).

**How severe is novel coronavirus?**  
 Experts are still learning about the range of illness from novel coronavirus. Reported cases have ranged from mild illness (similar to a common cold) to severe pneumonia that requires hospitalization. So far, deaths have been reported mainly in older adults who had other health conditions.

**What are the symptoms?**  
 People who have been diagnosed with novel coronavirus have reported symptoms that may appear in as few as 2 days or as long as 14 days after they are exposed to the virus:

 **Fever**   
  **Cough**   
  **Difficulty breathing**

○ Russian  
**Concerns about COVID-19?**  
 Do these things to prevent any kind of respiratory illness

**Wash your hands often.**  

**Cover your coughs & sneezes.**  

**Call ahead before visiting your doctor.**  

**Stay home when sick.**  
 If you have severe symptoms that need medical attention, call the clinic before going in.  

**Clean all "high-touch" surfaces daily.**  

**If you are sick:**

- If you have symptoms like cough, fever, or other respiratory problems, contact your regular doctor first. Do not go to the emergency room. Emergency rooms need to be able to serve those with the most critical needs.
- If you have traveled, make sure to tell your doctor about it.
- Healthcare providers are working with local public health departments and CDC to determine who needs to be tested for COVID-19.  
[www.cdc.gov/coronavirus/2019-ncov/about/steps-when-sick.html](http://www.cdc.gov/coronavirus/2019-ncov/about/steps-when-sick.html)

**For more information:**  
 The Washington State Department of Health has established a call center to address questions from the public. If you have questions about what is happening in Washington, how the virus is spread, and what to do if you have symptoms, please call 1-800-525-0127 and press 8.  
[www.doh.wa.gov/emergencies/coronavirus](http://www.doh.wa.gov/emergencies/coronavirus)

**Compassion keeps our community strong.**

**Have compassion for others.**

- Viruses don't discriminate based on race, ethnicity, or cultural background. This kind of stigma makes any situation worse, not better!
- Everyone reacts differently to stressful situations. Practice compassion towards others who may have a different experience.

**Compassion keeps our community Strong**

**Have compassion for people who are sick or social distancing.**

- Reach out virtually to someone you care about who is at home sick or in self-quarantine.
- If you see someone in public coughing or sneezing, be kind. Offer a tissue, or kindly suggest they cough into their elbow.

**Have compassion for yourself.**

- Make time to unwind and remind yourself that strong feelings will fade.
- Take breaks from watching, reading, or listening to news stories.
- Ask for help if you feel overwhelmed or concerned that COVID-19 is affecting your ability to function. It's ok to reach out to your primary care provider, a counselor, or faith leader for support.

## Orientación de COVID-19 para trabajadores y viviendas para trabajadores agrícolas

Los trabajadores agrícolas son una fuerza laboral crucial en el Condado de Grant. A fin de proteger a los trabajadores agrícolas para evitar la propagación de COVID-19.

### Recomendaciones Generales

- Todos los empleados y visitantes deben ser examinados al comienzo de cada turno o cuando vengan al rancho por primera vez a este centro. ¿Ha tenido alguno de los siguientes?
  - ¿Cansancio nuevo (100.4°F o más) o una sensación de fiebre?
  - ¿Una tos nueva que no puede atribuirse a otra condición de salud?
  - ¿Dificultad para respirar que no puede atribuirse a otra condición de salud?
  - ¿Síntomas de garganta que no puede atribuirse a otra condición de salud?
  - ¿Nuevos dolores musculares que no puede atribuirse a otra condición de salud, o que pueden no haber sido causados por una actividad específica (como el ejercicio físico)?
 Cualquiera que responda "SÍ" debe ser excluido. Los empleados con síntomas no deben ser permitidos trabajar y los visitantes no deben ser permitidos entrar al rancho. Los empleados deben ser enviados a casa y aislados. Las personas con síntomas deben comunicarse con su proveedor de atención médica.
- Animo a los empleados y ocupantes a permanecer en casa si están enfermos de los últimos 10 días. Informales sobre cualquier política de enfermedad.
- Los empleados y visitantes deben practicar el distanciamiento social y mantenerse a 6 pies de distancia tanto como sea posible, esto incluye cuando se trabaja afuera. Trabajar en el exterior no elimina todo el riesgo de exposición al COVID-19. El distanciamiento social debe hacerse cada vez que los trabajadores y los visitantes estén juntos, incluso durante las comidas y los descansos.
- Se recomienda que todos los empleados y visitantes usen siempre cobertores para la nariz y la boca, como un pañuelo o una máscara cosida en el rancho y al ir a lugares públicos como tiendas. No es apropiado llevar los suministros de atención médica, incluidas las máscaras quirúrgicas u otros equipos de protección personal para uso público. Por lo tanto, solo se recomienda que las empresas y el público utilicen máscaras no tradicionales o máscaras de tela.
- Evite tocar los ojos, la nariz y la boca con las manos sin lavar. El lavado adecuado de manos o el saneamiento deben estar disponibles para todos los empleados, voluntarios y visitantes. El CDC recomienda que las personas se laven las manos con frecuencia, y si no hay agua y jabón disponibles, use desinfectante para manos que contenga al menos 60% de alcohol.
- Mantengan un registro de todos los visitantes. Recopile información de contacto, fecha y lugar de los visitantes, incluidos proveedores, inspectores, etc.
- En la medida de lo posible, mantenga juntos los grupos de trabajo en las operaciones diarias.

## Guidelines for Gatherings of Children and Youth While Schools are Closed

School closures have been announced by the state, but parents still need to work and students still need safe and enriching spaces to spend their days. The COVID-19 pandemic calls on our whole community to think creatively about how to meet everyone's basic needs and maintain social connections while also limiting the spread of disease.

Here are some guidelines for hosting safe gatherings among children and parents outside of the school setting.

## Reducing Stress in yourself and others

During these uncertain times, it's natural to feel anxiety, worry or fear. It is important to make our emotional wellbeing a priority, while also following health recommendations to limit the spread of coronavirus (COVID-19).

Here are some tips to help cope with stress and anxiety:

- Knowledge is power. Make sure that you are getting and sharing accurate information from trusted sources, such as the CDC or Washington State Department of Health.
- Limit the number of news stories you read or watch.
- Stay connected with friends and family through phone calls, emails or web chats.
- Take care of your body by eating balanced meals, exercising and getting enough sleep.
- Share your concerns with others, if it's helpful.
- If you can, help others.
- Maintain a sense of humor.

### Helping Children

Children may also experience more stress at this time. They may react by being irritable, avoiding their favorite activities, worrying a lot, being sad, or not eating or sleeping well. You can support them by:

- Talking with them about the COVID-19 outbreak, and answering their questions.
- Reassuring them that they are safe.
- Limiting exposure to news coverage of the event, including social media.
- Trying to keep up regular routines.
- Being a role model. Take breaks, get plenty of sleep, eat well and exercise.

## Recommendations for Handling Pre-Packed Food Safely

Here are a few steps to take to ensure food safety:

- Transfer food from packaging directly to your plate or to a clean container to eat later.
- Wash your hands immediately after handling food packaging, and wash produce before you eat or prepare as normal. There is no need for additional washing or sanitizing.

Do not spray, bleach or disinfectant on your food. Hand washing remains one of the single most important things you can do to protect yourself and others.

Note: there is no current evidence to support the transmission of COVID-19 associated with food or food packaging.

**PRECAUCIONES PARA EL CORONAVIRUS (COVID-19)**

 Si tiene fiebre de más de 100.4F, tos o falta de aire, no trabaje. Dígale a su supervisor, váyase a su casa y llámelo a un médico.

 Use una cubierta sobre su boca y nariz cada vez que no esté en casa. Puede usar un pañuelo o una mascarilla de tela.

[English](#) Lávese las manos con frecuencia con agua y jabón. Si no puede lavarse las manos, use un desinfectante para manos con más de 60% de alcohol.  
 [Spanish](#)

 Manténgase a 6 pies de distancia de las personas que lo rodean cuando trabaja, come y sale al público.

 Solo salga de casa para ir a trabajar u obtener los artículos necesarios, como comestibles o visitar a un médico.

 No se reúnan en grupos grandes.
