2019 Novel Coronavirus Outbreak (COVID-19)

On January 21, 2020, the Centers for Disease Control and Prevention (CDC) and Washington State Department of Health announced the first case of 2019 Novel Coronavirus (COVID-19) in the United States in Washington State.

The Washington State Department of Health has established a call center to address questions from the public. If you have questions about what is happening in Washington, or how the virus is spread, please call 1-800-525-0127. Phone lines are currently staffed from 6 a.m. to 10 p.m.

Current situation in Washington

What's the current risk?

The risk posed by a virus outbreak depends on factors including how well it spreads between people, the severity of the illness it causes, and the medical or other measures we have to control the impact of the virus (for example, vaccine or treatment medications).

- COVID-19 is spreading in several communities in Washington, the risk of exposure is increasing for people who live in our state.
- Healthcare workers caring for patients with COVID-19 are at elevated risk of exposure.
- Those who have had close contact with persons with COVID-19 are at elevated risk of exposure.
- Travelers returning from affected international locations where community spread is occurring are at elevated risk of exposure.

Our knowledge of COVID-19 is still rapidly evolving. The risk assessment will be updated as needed.

2019 Novel Coronavirus (COVID-19) in Washington

County	Positive (confirmed) * †	Deaths
--------	--------------------------	--------

2019 Novel Coronavirus (COVID-19) in Washington

King	71	15
Snohomish	27	1
Grant	1	0
Jefferson	1	0
Pierce	1	0
Clark	1	0
Total	102	16

* Includes deaths

† Please contact the local health department for information.

Note: Some deaths may be reported by health care providers, medical examiners/coroners, local health departments, or others before they are included in the statewide count. It takes longer for the state to announce deaths because they are most often reported first to local health, then to us. Our daily web update includes all death reports we receive by the end of the previous day.

Last updated: March 7, 2020 at 11:00 a.m.
