Coronavirus Disease 2019 (COVID-19)

At this time there are 15 reported Wyoming cases.

The Wyoming Department of Health is closely monitoring the current coronavirus disease 2019 (COVID-19) outbreak situation and sharing recommendations.

We don't yet know exactly how easily COVID-19 spreads and how many people will experience severe illness. While we are facing a rapidly developing situation, the risk to most Wyoming residents remains low at this time.

The symptoms reported with this disease are familiar to all of us: fever, cough and shortness of breath.

Testing Numbers - 3/17/20 a.m. Tests completed at Wyoming Public Health Laboratory: 95 Tests completed at CDC lab: 1 Test results reported by commercial labs: 9 Confirmed cases: 15 (updated 3/17/20 p.m.) Counties with confirmed cases: Sheridan, Fremont, Laramie, Park

Click here to find COVID-19 Information for Healthcare Providers.

- Stay home when sick and avoid contact with other people unless you need medical attention.
- Follow advice from CDC on what to do if you think you may be sick.
- Follow common-sense steps such as washing your hands often and well; covering your coughs and sneezes; and cleaning and disinfecting.
- Nursing homes and other healthcare facilities should closely follow guidelines for infection control and prevention.
- As much as possible, assisted living facilities should follow the same infection control and prevention practices as nursing homes.
- Older people and those with health conditions that mean they have a higher chance of getting seriously ill should avoid crowds or close-contact situations.
- Follow current social distancing guidelines.
