

Coronavirus disease (COVID-19)

Situation Report – 166

Data as received by WHO from national authorities by 10:00 CEST, 4 July 2020

Highlights

[WHO is providing support to bridge a shortfall in oxygen supplies in Iraq.](#) To counter severe shortages, WHO has airlifted 300 oxygen concentrators from WHO's warehouses in the United Arab Emirates.

[As African countries begin to reopen borders and air spaces, it is crucial that governments take effective measures to mitigate the risk of a surge in infections.](#)

The UN Secretary-General, Mr António Guterres in his remarks to the Security Council on the Maintenance of International Peace and Security warned that the COVID-19 pandemic has been affecting peace and security around the world. He stated that [“Collective security and our shared well-being are under assault on many fronts led by a relentless disease and abetted by global fragilities.”](#)

[In Yemen, healthcare workers face a double battle – COVID-19 in a conflict zone.](#) WHO chronicles the work of Dr Sami Al Hajj, a young doctor working at the Science and Technology Hospital in Sana.

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	10 922 324 cases (212 326)	523 011 deaths (5 134)
Africa	342 415 cases (12 619)	6 628 deaths (142)
Americas	5 575 482 cases (129 772)	259 094 deaths (3 392)
Eastern Mediterranean	1 135 604 cases (20 043)	26 521 deaths (493)
Europe	2 757 556 cases (19 694)	199 510 deaths (565)
South-East Asia	888 732 cases (27 947)	23 774 deaths (534)
Western Pacific	221 794 cases (2 251)	7 471 deaths (8)

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 28 June to 4 July **

**See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 4 July**

**See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 4 July 2020**

Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the “new cases” / “new deaths” columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

i Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures

- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area
- Pending: transmission classification has not been reported to WHO

ii “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific updates and errata

- **Update 4 July 2020, Norway:** Counts adjusted retrospectively by national authorities: 7 cases excluded on 3 July.
- **Update 4 July 2020, Faroe Islands:** Counts adjusted retrospectively by national authorities between 5 March and 22 March.
- **Erratum 4 July 2020:** In Figure 1 and Figure 2 of the initial publication of this situation report data was inaccurately reflected. The figures have now been updated.
