

Coronavirus disease (COVID-19)

Situation Report – 170

Data as received by WHO from national authorities by 10:00 CEST, 8 July 2020

Highlights

[WHO experts will travel to China to work together with their Chinese counterparts to prepare scientific plans for identifying the zoonotic source of the SARS-COV-2 virus.](#) The experts will develop the scope and terms of reference for a WHO-led international mission.

[WHO has delivered \\$1.6 million worth of essential COVID-19 medical supplies and equipment to Afghanistan,](#) a country with a health system facing severe challenges. The shipment, amounting to a total of 9.5 tons, includes personal protective equipment, PCR machines, oxygen concentrator machines, and stretchers, as well as other equipment. It will bolster efforts to keep frontline medical staff safe and improve testing capacity in the country.

[Burkina Faso has resumed polio vaccination campaigns under strict COVID-19 prevention measures.](#) "We cannot wait for the COVID-19 pandemic to be contained to resume immunization activities." said Dr Matshidiso Moeti, WHO Regional Director for Africa.

As the region of the Americas reports 100,000 cases of COVID-19 a day, [the Director of the WHO Regional Office of the Americas, Dr Carissa F. Etienne, has called for strong coordination across countries, evidence to guide leaders' actions and for people to protect themselves and others.](#)

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	11 669 259 cases (168 957)	539 906 deaths (4 147)
Africa	397 942 cases (15 379)	7 415 deaths (276)
Americas	6 004 685 cases (89 134)	268 828 deaths (2 092)
Eastern Mediterranean	1 204 698 cases (17 078)	28 664 deaths (562)
Europe	2 827 789 cases (17 941)	201 255 deaths (604)
South-East Asia	1 001 655 cases (27 266)	26 224 deaths (605)
Western Pacific	231 749 cases (2 159)	7 507 deaths (8)

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 2 July to 8 July **

**See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 8 July**

**See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 8 July 2020**

Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

ⁱ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area
- Pending: transmission classification has not been reported to WHO

ⁱⁱ "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific updates and errata

- None
