

# Coronavirus disease (COVID-19)

## Situation Report - 181

Data as received by WHO from national authorities by 10:00 CEST, 19 July 2020

### Highlights

COVID-19 affects us all, but most especially vulnerable populations such as refugees and migrants. To assess the public health and social impact of the COVID-19 pandemic on refugees and migrants, WHO and partners are conducting a global study called 'ApartTogether'. [You can participate through a survey currently being conducted.](#)

To combat misconceptions about COVID-19 in Nigeria, [WHO and the Nigerian government are scaling up strategies to demystify COVID-19 by working with traditional leaders](#). The aim is to empower traditional leaders, who command great respect, to participate in on-going sensitization efforts and to sustain the strategy by letting community members lead the campaign.

*Thank you for reading the WHO COVID-19 Situation Report! We would greatly appreciate any feedback and suggestions you may have on these reports via a [short anonymous survey](#).*

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

<b>Globally</b>	14 043 176 cases (166 735)	597 583 deaths (4 496)
<b>Africa</b>	579 091 cases (17 625)	9 546 deaths (197)
<b>Americas</b>	7 376 748 cases (70 377)	305 285 deaths (2 777)
<b>Eastern Mediterranean</b>	1 374 503 cases (13 712)	34 226 deaths (488)
<b>Europe</b>	3 060 525 cases (18 195)	206 965 deaths (281)
<b>South-East Asia</b>	1 391 407 cases (43 453)	33 543 deaths (636)
<b>Western Pacific</b>	260 161 cases (3 373)	8 005 deaths (117)

# Surveillance

Figure 1. Number of confirmed\* COVID-19 cases reported in the last seven days by country, territory or area, 13 July to 19 July \*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed\* COVID-19 cases, by date of report and WHO region, 30 December through 19 July\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

**Table 1. Countries, territories or areas with reported laboratory-confirmed\* COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 19 July 2020\*\***

Reporting Country/Territory/Area	Total confirmed* cases	Total confirmed* new cases	Total deaths	Total new deaths	Transmission classification <sup>i</sup>	Days since last reported case

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

### Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

\*A small number of countries/territories/areas report combined probable and laboratory-confirmed cases; efforts are underway to identify these for notation in the data table.†Other: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the “new cases” / “new deaths” columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days,

graphics will be updated accordingly. Prior situation reports will not be edited; see [covid19.who.int](https://covid19.who.int) for the most up-to-date data.

### **Additional table notes**

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases;
- Sporadic cases: with one or more cases, imported or locally detected;
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures;
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area;
- Pending: transmission classification has not been reported to WHO.

ii “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

### **Country, territory, or area-specific notes, updates and errata**

- **Note, United States of America:** no updates were received today prior to the data cutoff time, thus regional and global totals for new cases and deaths are substantially reduced. The figures will be adjusted when data are available.
