

Coronavirus disease (COVID-19)

Situation Report – 206

Data as received by WHO from national authorities by 10:00 CEST, 13 August 2020

Highlights

There have been notable achievements made by Azerbaijan in their response to the COVID-19 pandemic. To further boost its response to the ongoing pandemic, a team of WHO experts has recommended that [the country strengthen contact tracing and testing](#).

Access to basic handwashing facilities is a key condition for schools to be able to operate safely in the midst of the COVID-19 pandemic. Yet the latest data from the WHO/UNICEF Joint Monitoring Programme (JMP) found that [43% of schools worldwide lacked access to basic handwashing with soap and water in 2019](#).

[More than 2800 community health workers have been trained in Haiti](#) as part of the response to the COVID-19 pandemic, and meetings have been conducted with community leaders to provide them with accurate information about COVID-19. All of these efforts provide much-needed support to the Ministry of Health and the country's Multisectoral Pandemic Management Commission of COVID-19.

There has been a [continued commitment to measles and rubella elimination](#) in the WHO European Region, although the COVID-19 pandemic is placing an extraordinary burden on health systems.

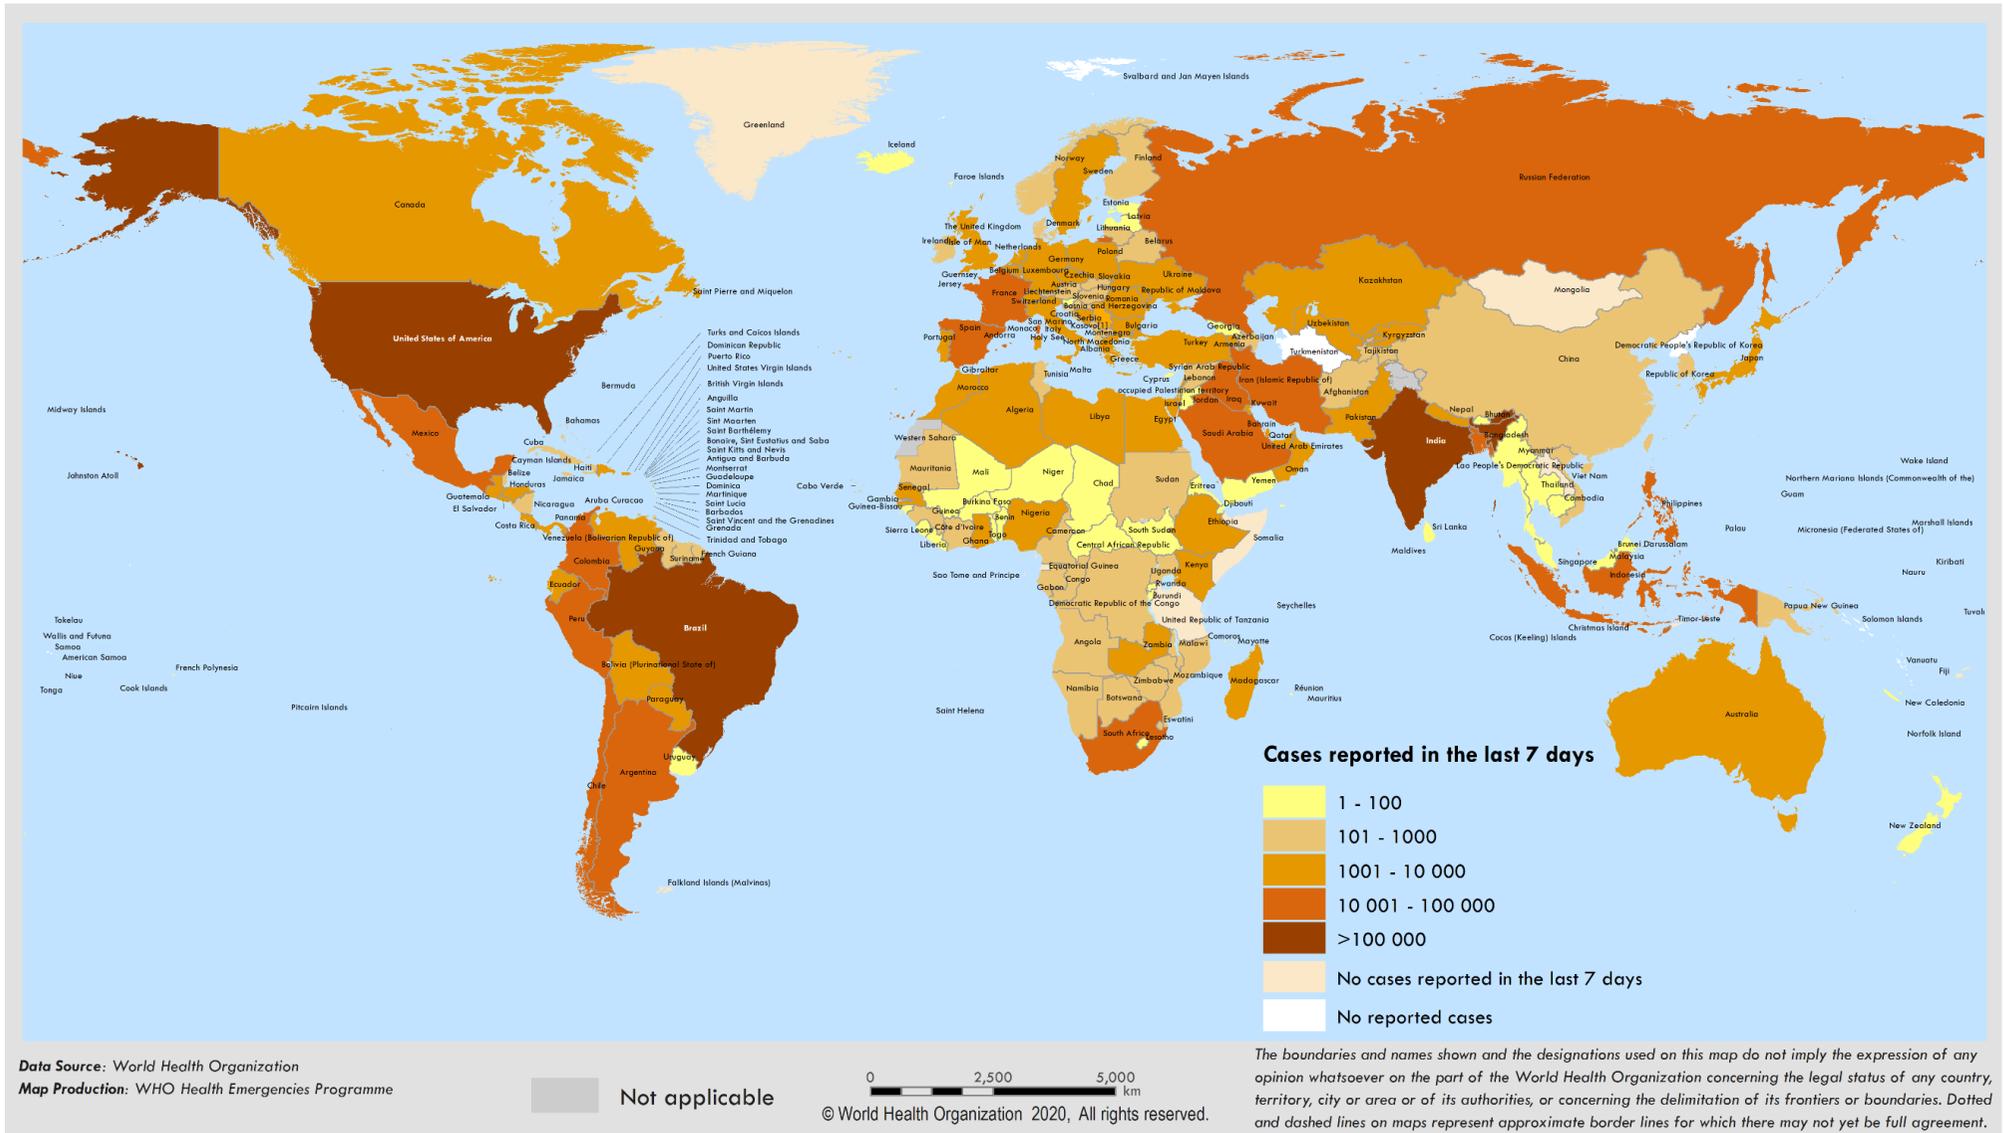

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	20 439 814 cases (276 398)	744 385 deaths (6 933)
Africa	916 644 cases (7 070)	17 557 deaths (359)
Americas	10 950 220 cases (151 158)	398 229 deaths (4 502)
Eastern Mediterranean	1 683 511 cases (13 578)	44 661 deaths (373)
Europe	3 668 652 cases (26 107)	218 255 deaths (504)
South-East Asia	2 830 404 cases (72 582)	56 636 deaths (1 072)
Western Pacific	389 642 cases (5 903)	9 034 deaths (123)

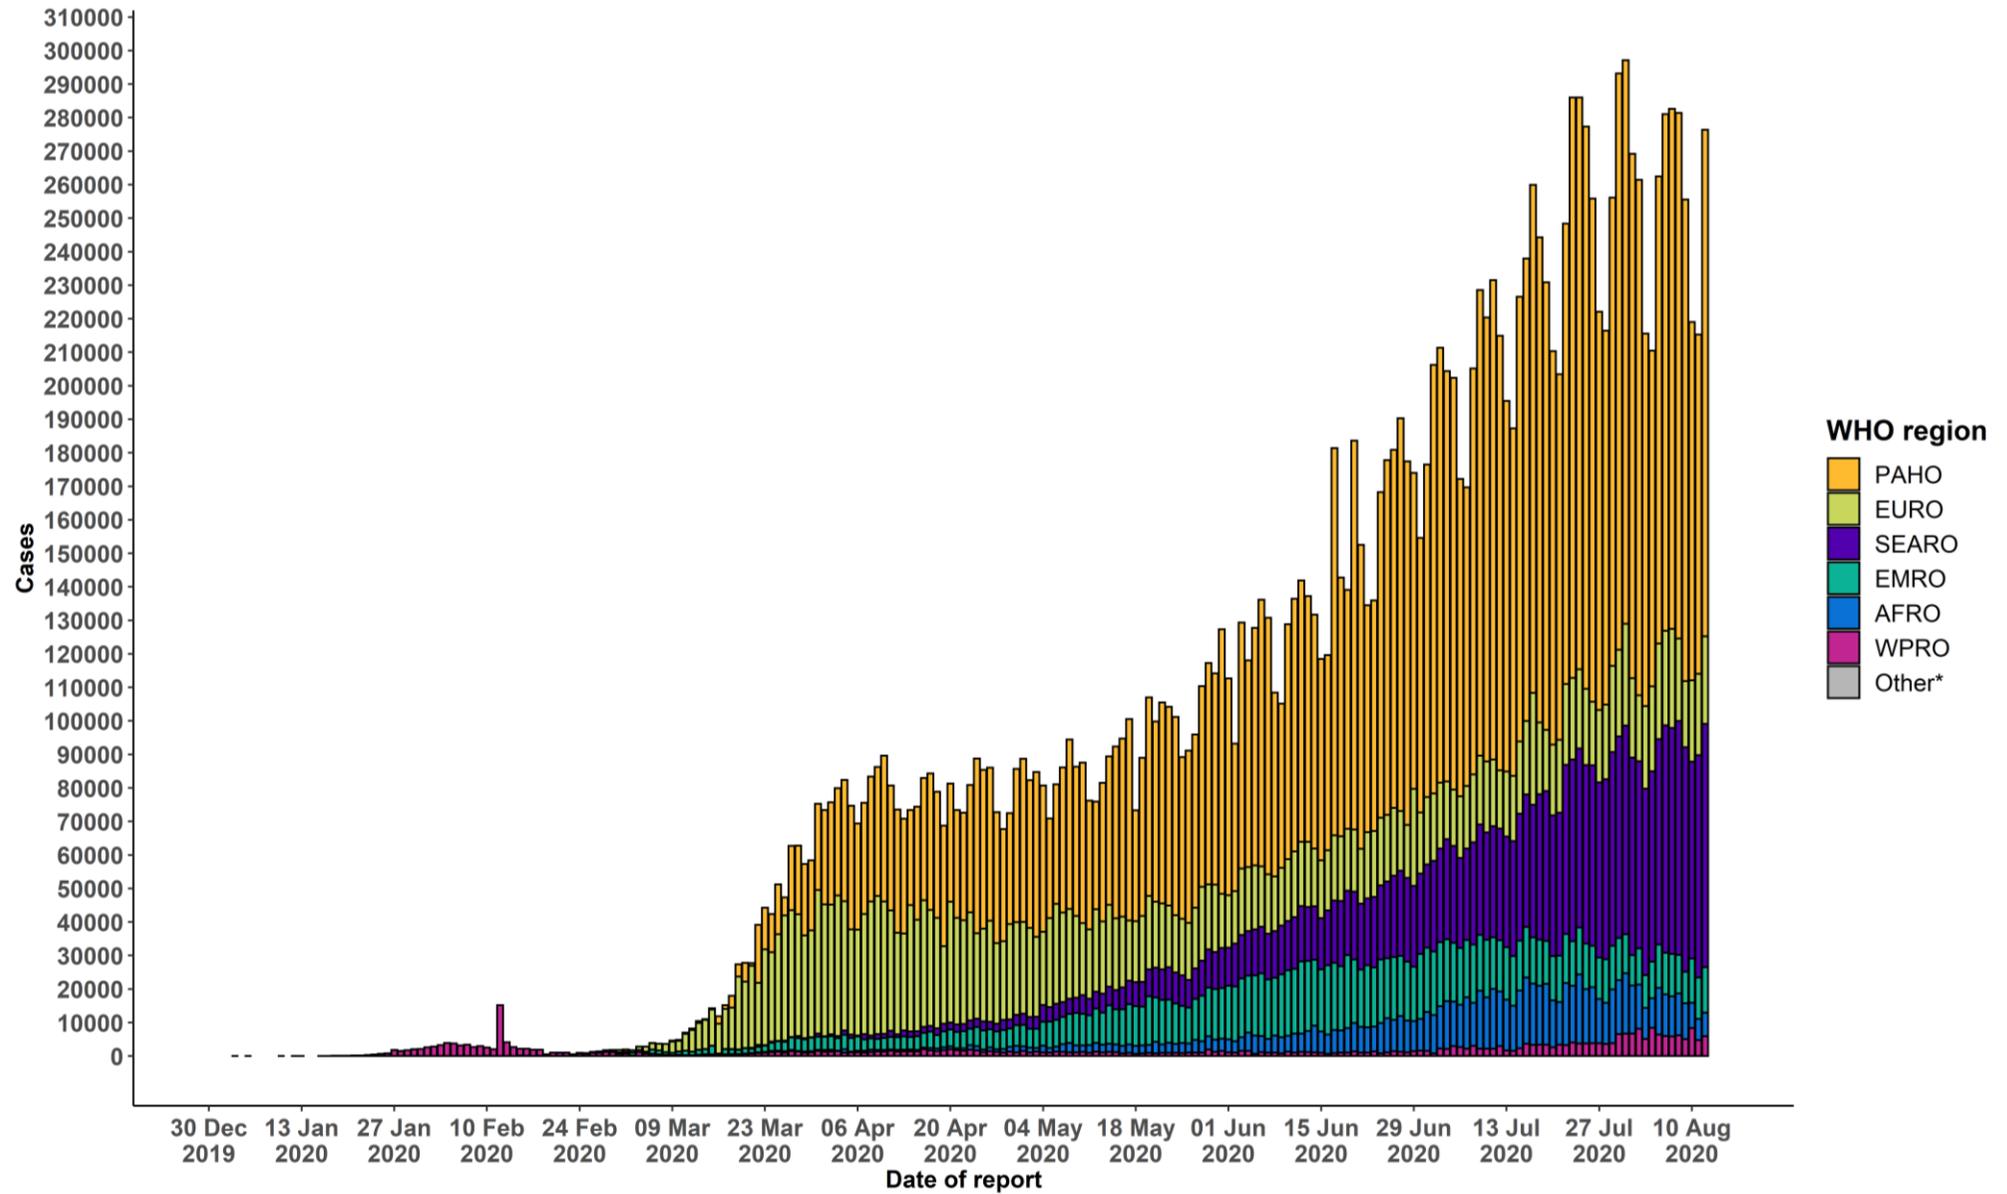

Surveillance

Figure 1. Number of confirmed* COVID-19 cases reported in the last seven days by country, territory or area, 7 August to 13 August **

**See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed* COVID-19 cases, by date of report and WHO region, 30 December through 13 August**

**See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed* COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 13 August 2020**

Case definitions

WHO periodically updates the [Public health surveillance for COVID-19: interim guidance](#) document which includes surveillance definitions.

Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

*A small number of countries/territories/areas report combined probable and laboratory-confirmed cases; efforts are underway to identify these for notation in the data table.[†]Other: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

ⁱ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information

becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases;
- Sporadic cases: with one or more cases, imported or locally detected;
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures;
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area;
- Pending: transmission classification has not been reported to WHO.

ii "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific notes, updates and errata

- **Update 13 August 2020, Belgium:** Counts adjusted retrospectively by national authorities: case counts adjusted from 6 to 12 August and death counts adjusted from 2 to 12 August.
- **Update 13 August 2020, Bosnia and Herzegovina:** Counts adjusted retrospectively by national authorities: case and death counts adjusted from 11 to 12 August.
